Paxton APN-1092 Integrating Web Cam User Guide

Net2 APN-1092

Integrating a web cam for use with Net2 user records
Installing the web cam

There is no configuration necessary as the Net2 software will respond to the camera's own drivers and software. Once you have installed a web cam on your PC, shut down and restart the Net2 server (v4.11 or later) and you will see additional buttons on the user screens. The web cam can then be used for capturing photos for user records.

Contents

New user records

With a web cam installed, the following screen will display when you show a new token to a desktop reader or

directly click on Add User.

Add user

Please select the type of token which you wish to issue

Token type: Default | New type

First name: [ ]
Middle name: [ ]
Surname: [ ]
Department: (none)
Access level: No access
Telephone: [ ] [ ]
Fax: [ ]
Valid from: 11/06/2010
Expires end: 11/06/2010
Address 1: [ ]
Address 2: [ ]
Town: [ ]
County: [ ]
Post code: [ ]
Home telephone: [ ]
Home Fax: [ ]
Mobile: [ ]

Get picture
Capture Picture

Email: [ ]
Position: [ ]
Start date: [ ]
Car registration: [ ]
Notes: [ ]
Personnel number: [ ]
PIN: [ ] Auto PIN
Token number: [ ]

○ When I click 'Add user' reload the token type default values
● When I click 'Add user' retain the previous record values

Close | Add user

Click on the Capture Picture button to bring up the webcam image.
(The Get Picture function is used to select a photo already stored on the PC)

Here we see the live image displayed by the web cam. Once you have the view that you require, click on Capture. If you are happy with the image click 'OK'

The picture will load into the Add User screen and will be saved with the users other information. Create the user record by clicking on the Add User button.

This screen shows the user record with the captured image displayed.
You will see that a Capture Picture button is also available on the user record so that the webcam can be used to update current records.
