MACRO

   	Macro Record / Record Stop
	Macro 1
	Macro 2
	Macro 3

How to:

1. Press FN+1 (1 or 2 or 3, the one you want to change or save).
2. Press FN+PrtSc (1, 2, 3 key will blink. Which means the keyboard is ready to record macro).
3. Start typing your macro. The keyboard will memorize the exact timing and the keystroke automatically.
4. Press FN+ PrtSc again to save. your macro. Same thing to FN+2 and FN+3.

LED Custom Mode

LED Custom mode allows you to change each key colors.

  	LED Custom Mode Record Start / Stop
	LED Custom Mode 1
	LED Custom Mode 2

How to:

1. Press FN+9 or FN+0 (The one you want to change or save).

2. Press FN+

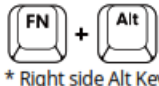

3. Press each key to set your desired color. Each press on the same key changes the color.

[Red ► Orange ► Yellow ► Green ► Blue ► Navy ► Purple ► Pink ► White ► Off]

4. Once you are done, press FN+← to save it.

* If you are not pressing any keys for 10sec during the record mode, the keyboard will automatically save your setting as it is and exit the recording mode.

ID Tag LED

 * Right side Ctrl Key  * Right side Alt Key	ID Tag LED Pattern Change
	ID Tag LED Color Change

How to:

1. Press FN+ right side Ctrl to switch the ID Tag LED pattern.

[Wave (Default) ► Static ► Breath ► Neon ► Off]

2. Press FN+ right side Alt to switch the ID Tag LED color under Breath and Static pattern.

[Red ► Yellow ► Green ► Teal ► Blue ► Purple ► White]
