## **Learning Tower Introducing Petinka Learning Tower**

## Specifications

- **Material:** Health-friendly birch plywood
- **Recommended Age:**
  - **Premium Version:** 12 months and above
  - **Basic/Classic Version:** 24 months and above
- **Safety Standards:** EU safety standards EN 71

## Product Usage Instructions

### Assembly

1. The assembly should be carried out by an adult.
2. Refer to the provided pictures for assembly guidance based on the version of the tower.
3. Visit the website [www.petinka.com](http://www.petinka.com) for additional attachment options like the Ready to Activity (RTA) back wall for toys.

### To Whom the Tower is Intended

The learning tower is designed for parents and children primarily for kitchen use. It

allows children to safely explore, play, observe, and even participate in cooking activities.

- **Premium Version:** Suitable for children who can stand but not walk properly (recommended age: 12 months).
- **Basic/Classic Version:** Suitable for children who can walk and climb independently (recommended age: 24 months).

## Important Notices

- Always supervise your child while they are in the learning tower.
- Ensure all screws are tightly secured before placing the child in the tower.
- Regularly check and tighten screws if necessary.
- Keep hazardous objects away from the tower to prevent accidents.
- Remove safety grilles only when the child can walk without stability issues.
- Be cautious when removing the front safety wall to avoid overturning.

Thank you for purchasing the PETINKA Learning Tower.

Before you start with the assembly of the PETINKA Learning Tower, please read this user guide carefully.

We highly recommend keeping this manual for potential future purposes.

## PRODUCT DESCRIPTION

### Assembly

The assembly must be done by an adult person.

This user guide includes pictures of the assembly for towers in the versions:

- **BASIC:** tower in standard configuration without safety walls
- **CLASSIC:** tower in standard configuration without safety walls and with the Ready to Activity back board
- **PREMIUM:** learning tower with four detachable safety walls, including the Ready to Activity (RTA) back wall for attaching toys and activities

Adjust the step platform according to the age of the child – three levels of adjustment are available. The upper edge or tower should not be lower as the child's belly. Always fasten the step platform with the enclosed screws.

Every toy comes with instructions how to attach them on the RTA board. You can find the toys and accessories on the web page [www.petinka.com](http://www.petinka.com).

### **To whom the tower is intended:**

The learning tower is an aid for the parents and children, which primary use is in the kitchen, and it serves the child for a safe discovery of the world from other perspectives, to play, to observe the adults during cooking and according to the child's abilities also participate in it. The tower is designed for one child only. Learning tower in the version:

- PREMIUM is designed for children who can stand on their own but can not walk properly and does not have perfect stability (the adult puts the child into the tower). The recommended age for use of the tower in the version PREMIUM is 12 months.
- BASIC/CLASSIC is designed for children who can walk and are able to climb in and out of the tower on their own. The recommended age for use of the tower in the version BASIC/CLASSIC is 24 months.

### **Important Notices:**

- Never leave your child in the learning tower without the supervision of an adult person.
- The tower does not serve as a baby-corner.
- Before putting the child into the learning tower, make sure that all screws are fully tighten.
- We recommend checking the screws regularly and tighten if needed.
- Put the bundled torx key on a safe place.
- Keep small objects, sharp objects, poisonous substances, hot objects, electric cables away from the child's reach, in safe distance from the learning tower (possible choking hazard, intoxication or other injuries).
- Do not place the learning tower near places with open fire or other heat sources such as electric flames, gas flames etc. because of danger of inflammation.
- Place the learning tower on a firm and straight ground (we recommend using the enclosed furniture felt pads on the tower's base to avoid damaging the floor with scratches

- Remove the side safety grilles only if the child can walk and when there is no risk of losing stability and falling out of the tower's entrance hole.
- After removing the side safety grilles please increase your attention until the child gets used to the new way of the tower's use – climbing in and out of the tower on its own.
- In case of removal of the front safety wall that faces the kitchen unit, pay attention that the child is not pushing with its legs against the kitchen unit (despite the learning tower's great stability), a rapid/intense push can lead to the tower's overturn.

## **Cleaning and Maintenance**

Clean the tower with a wet towel. Remove the fat with detergents. We do not recommend cleaning it with abrasive polishing scrubs or microfiber towels. If the tower is exposed to direct sunlight the color of the tower may fade. Placing the tower in a humid or permanently wet area might damage the tower or weaken the quality of the materials.

## **Product Information**

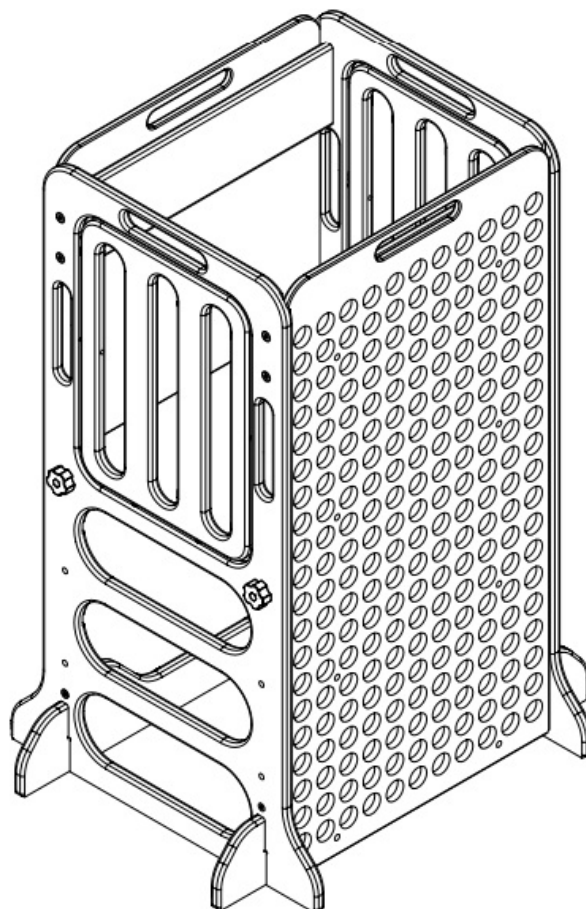

The PETINKA Learning Tower is made of health friendly birch plywood.

## **Disposal**

Dispose the tower at your local waste disposal.
