**petrotools CannaFogger Battery Powered Fogger Machine**

## Product Information

- Product Name: PetraTools CannaFogger
- Manufacturer: PetraTools
- Model: CannaFogger – Rated Power: 25W
- Battery Capacity: 2200 mAh
- Bottle Capacity: 13.50 oz
- Product Dimension: 8\*3\*8 in
- Input Voltage: DC 12V
- Charger: DC5V Type-C
- Charger – Recharge Time: 6 Hours
- Usage Time: up to 2 Hours –
- Weight: 2 lbs

## Product Usage Instructions

1. Charge the CannaFogger for at least 5 hours before first use using the provided Type-C charger.
2. Test the CannaFogger before spraying for the first time. Unscrew the container, partially fill it with clean water, and tightly screw it back on to the unit.
3. To turn on the CannaFogger, slide the switch button towards the bottom of the unit where it indicates ON.
4. Press the M button to power on the unit and cycle through the power settings of low, medium, and high.
5. To turn off the CannaFogger, slide the switch button to where it indicates OFF.
6. You can toggle the blue light on/off by double-clicking the Mist Volume Adjustable Knob.
7. For detailed product specifications and information on parts or accessories replacement, visit [petratoools.com](https://petratoools.com)
8. To join the Gold Club and enjoy benefits like an extended warranty, free products, and dedicated support, visit [petratoools.com/gold](https://petratoools.com/gold).

Common maintenance questions: [www.petratools.com/start](https://www.petratools.com/start)

**Operating Instructions**

Watch the quick start video at [www.petratools.com/start](https://www.petratools.com/start) for the fastest way to get started.

1. Charge your CannaFogger for 5+ hours prior to use.

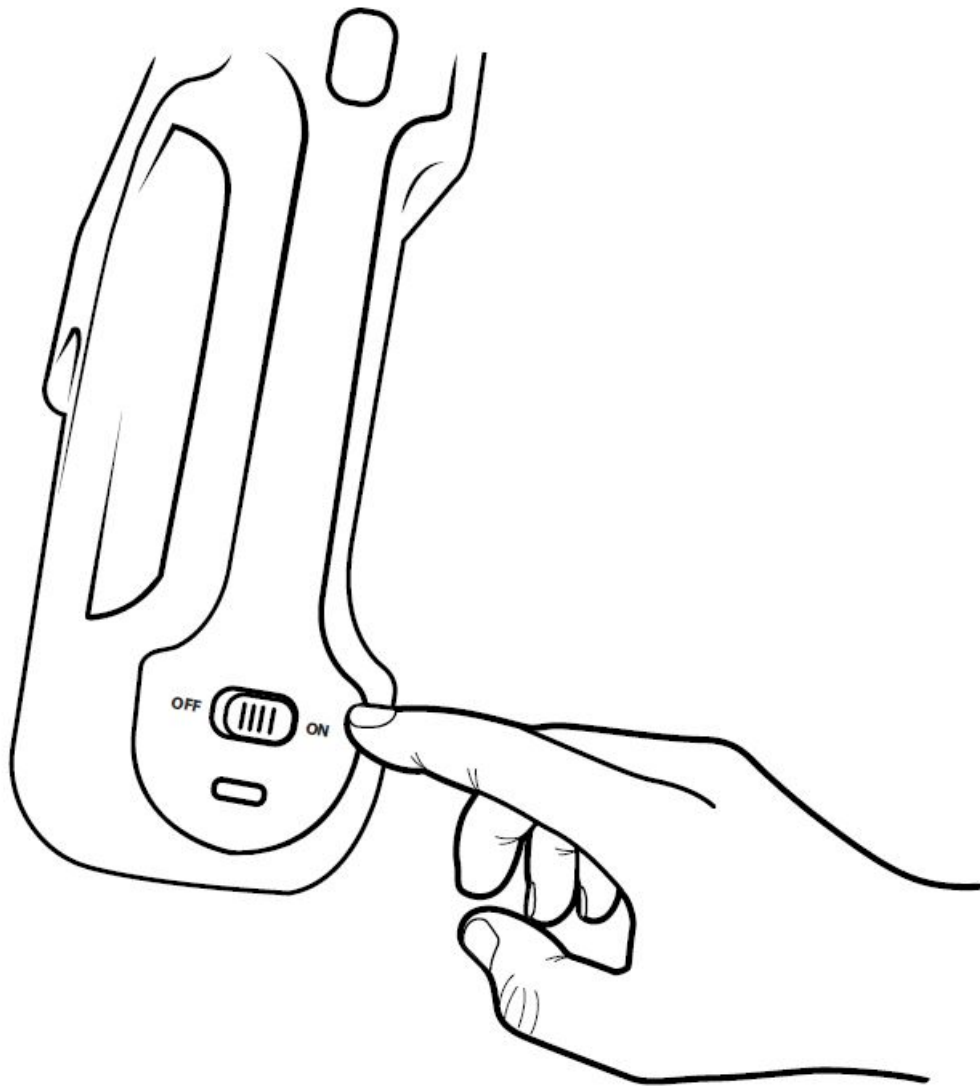

**USB  
Type-C**

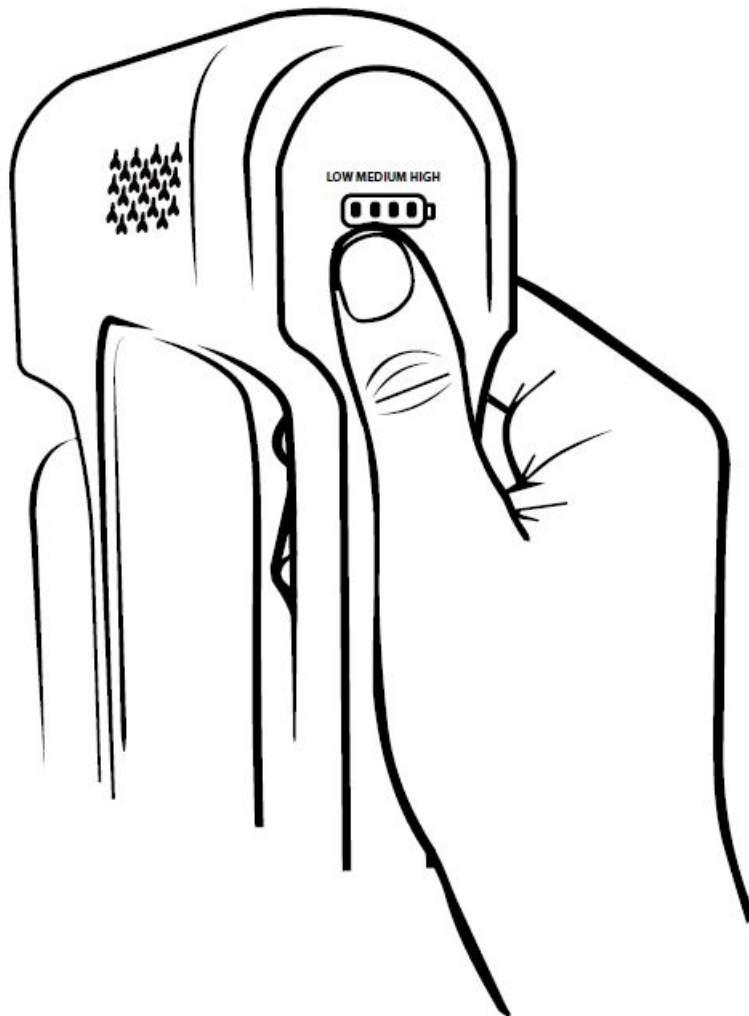

1. To optimize the performance of your CannaFogger, it is recommended that you fully charge the battery for a minimum of 5 hours prior to use. This is because lithium-ion batteries are often shipped with a partial charge for safety reasons, and a full charge is necessary to achieve maximum spraying time.
2. Before spraying for the first time, test your PetraTools CannaFogger by unscrewing the container, filling it partially with clean water, and screwing it back on tightly to the unit.

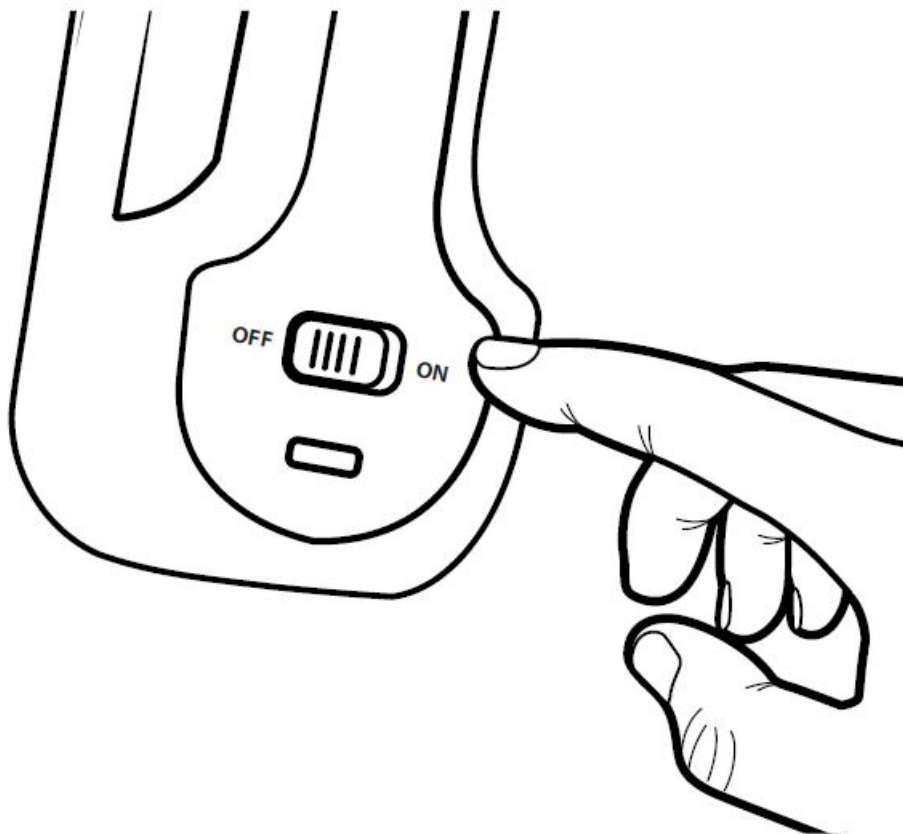

3. To turn on the PetraTools CannaFogger, slide the switch button towards the bottom of the unit where it indicates ON.

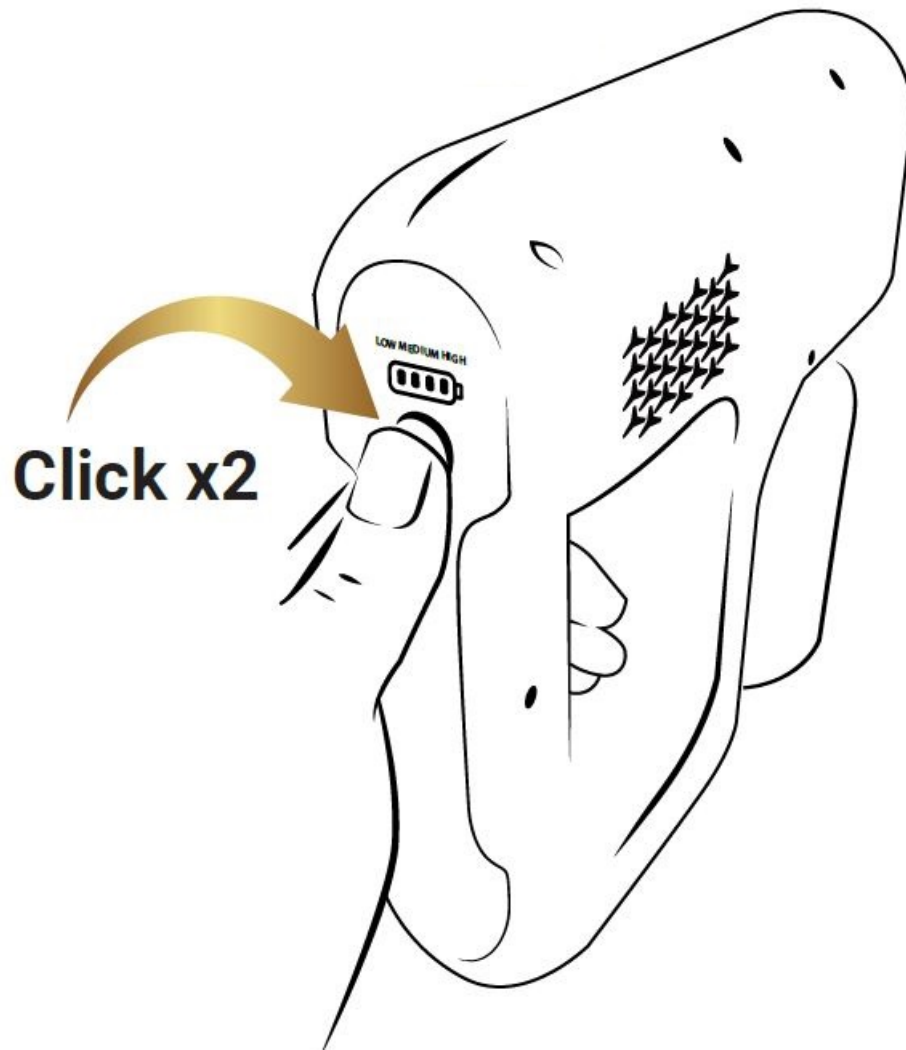

4. Press the "M" button to power on the unit and cycle through the power settings of low, medium and high

5. To turn off the PetraTools CannaFogger, slide the switch button to where it indicates OFF.

## Turning On and Off Blue Light

You can toggle the blue light On/Off by double-clicking the Mist Volume Adjustable Knob.

## Product Specifications

1. Cooling Window
2. Mist Volume Indicator
3. Mist Volume Adjustable Button
4. 2200 mAh Rechargeable Battery
5. Power On/Off Switch
6. Battery Power Indicator

#### FAQ

Visit [Petratools.com/support](https://petratools.com/support) to watch full instruction video.

- What is the PetraTools CannaFogger's droplet size?  
8 microns
- How long does it take to go through one full PetraTools CannaFogger tank?  
Depending on power setting, it can take 11 to 16 minutes to deplete a full tank.
- How many PetraTools CannaFogger tanks can I do with full charge?  
Depends on power setting but at least 7-11 full tanks.

- How do I clean my PetraTools CannaFogger?

Run a quarter tank of warm soapy water through the sprayer after use.

- What can I not put in my PetraTools CannaFogger?

Very thick, chunky, mixtures

- What can I put in my PetraTools CannaFogger?

Any solution that has the same consistency as water. If using drying agents such as isopropyl alcohol, know that these can increase the wear on the unit.

- What size is the tank/reservoir?

13.5 oz or 400mL

- Can I turn the blue light off?

Yes, double-press the top “M” button

- How much Crop Defender do I mix in a full bottle?

3 – 9 mL

## Application

Our PetraTools CannaFogger can adjust the amount of spray by tapping the volume button. Spray distances of up to 5 feet can be achieved, as needed.

## Maintenance

- After each use, run warm soapy water through the unit for 10 seconds followed by water for another 10 seconds to clear out the soap.
- Visit <http://www.petratools.com/support> for further cleaning and storage recommendations.

## Safety Warnings

**WARNING:** THE PETRATOOLS CANNAFOGGER IS DESIGNED TO APPLY CHEMICALS THAT MAY BE HARMFUL AND COULD CAUSE SERIOUS PERSONAL INJURY IF INHALED OR BROUGHT INTO CONTACT WITH THE USER OR OTHER INDIVIDUALS OR ANIMALS. FAILURE TO READ THE INSTRUCTION MANUAL AND WATCH THE SAFETY VIDEOS BEFORE USE OF THIS PRODUCT COULD RESULT IN MAJOR INJURY OR DEATH.

- It is recommended to use the product for no more than 2 hours at a time to prevent the machine from overheating.
- Fill the bottle with your solution and only fill up to the bottle limit line.
- Unsupervised minors should not be allowed to use the PetraTools CannaFogger.
- Using the PetraTools CannaFogger under dangerous conditions may cause injury to you, others or property. Do not modify the CannaFogger in any way that is not explicitly recommended in PETRATOOLS videos or instructions.
- We do not recommend using the PetraTools CannaFogger with any substance with a consistency that is thicker than water.
- NEVER use this unit to spray highly toxic chemicals, undiluted pesticides, banned pesticides, and special chemicals.
- DO NOT use this unit for paint spraying.
- If chemicals start to leak when you are using the CannaFogger, make sure to tighten all connection points. If any chemicals get on your skin, wash them off immediately as directed by the chemical manufacturer's instructions.
- Whenever you are dealing with chemicals, always follow and refer to their safety instructions.
- DO NOT turn on and off the power switch frequently to avoid damage to the switch and motor.
- After spraying, we recommend taking a shower to rinse yourself off entirely.
