IMPORTANT SAFETY INSTRUCTIONS

READ THE ENTIRE PRODUCT LABEL AND OWNERS MANUAL BEFORE USING

For Outdoor Use

Weatherproof Construction

Grid Voltage:600V

Brightness: 35 Lumens

Light Color: Warm White

Charging: Charges in Direct Sun

Run Time: 6+ Hours

Features & Benefits

UV LED

Flame Effect LED

Easy-Clean Catch Tray

No Open Flame Concern

ABOUT THIS PRODUCT:

The PIC@Insect Killer Torch is a solar replacement to standard oil-burning torches that kills bugs on contact. The product charges in direct sunlight and on a full charge last 6+ hours. In the darkness, the LED flame turns on creating an ambiance for your outdoor living space. At the same time, the UV light and 600-volt zapper activate like a standard bug zapper. Each torch purchase includes a ground stake, 3 poles, connectors, and a tabletop base (See **Figure 1**) and easily adjusts between 4 use patterns (See **Figure 2**.) Use as a standard torch down to a path light, or you can simply insert the torch into the tabletop base.

FIGURE 1: COMPONENTS

What is included in your purchase:

FIGURE 2: (4) USE PATTERNS

CHOOSE THE LOCATION:

The product is to be charged in direct sunlight outdoors. It's recommended to place the product away from your outdoor living space so insects can be drawn towards the zapper and away from your space. Built to be weatherproof, it can be placed outdoors on the ground or can be placed on a table.

INSTALLATION AND OPERATION:

For best practice, install the unit just before the start of the season in your area and leave it in place until the end of the season.

To activate the product, press the power button located on the neck of the torch. You will not need to press the button again. As stated, the product charges during the day in direct sun and turns ON in darkness. The product will run for 6+ hours on a full charge.

For off-season storage, save the outer box and packing materials. Press the power button to turn it OFF before storing.

To clean the product, slide the catch tray from the unit and discard insect debris. For debris that may be remaining inside the torch or on the electrical grid, carefully spray canned compressed air or use the hairdryer on a cool setting. **Never spray water or cleaners on the product.**

IMPORTANT SAFETY INFORMATION

This product is for outdoor use only. Check the product frequently to ensure debris and dead insects are not accumulating inside as it may contribute to fire. Do not bend the electrical grid and do not attempt to make repairs on the unit. Call our customer service department at **1-800-799-7302** for additional questions or assistance.

CAUTION – HIGH VOLTAGE, KEEP OUT OF REACH OF CHILDREN.

CAUTION – Collected insects may be a fire hazard. Clean dead insects frequently.

CAUTION – Do not stick foreign objects, metal objects, or fingers into any part of the product.

CAUTION – Do not tamper with or modify the product.

CAUTION – Do not clean or spray the unit with water, cleaning spray, or any other liquid.

CAUTION – Do not submerge the unit in water or any liquid.

CAUTION – Keep out of contact with paper, clothing, heat sources, gas, oil, or flammable items.
