## Instruction Manual

Be sure to read this instruction manual before installing this speaker.

### **WARNING**

Over time, your hearing “comfort level” adapts to higher volumes of sound, so that what sounds “normal” can actually be doing harm. To protect against hearing loss, set your equipment’s volume at a low setting, slowly increase it until you can hear it comfortably and clearly, and leave it there. Do not turn up the volume so high that you can’t hear what’s around you.

### **CAUTION**

1. Do not touch the speaker flexible wire .
2. Do not use the speaker independently. To avoid breakage, be sure to use the specified network.
3. Do not change the direction of the speaker terminal assembly .
4. Make sure lead and speaker terminals do not contact metal.
5. When making connections, refer also to the instruction manual of the car stereo used.
