## Step 1 Measure VESA

Measure the distance between the holes located at the back of your TV (these measures may form the shape of a square, or a rectangle) and check that these taken measures are within the VESA (\*) range for this wall mount. (\*) VESA: International standard established by the TV manufacturers used to determine if LCD/LED TVs are compatible with wall mounts.

## Step 2-1 Choose the combination that applies to your VESA

Determine which TV bracket option A, B, or C, to use based on your TV hole pattern measurements from STEP 1.

## Step 2-2 Select TV hardware

1. Bolt diameter: hand thread bolts into threaded inserts on the back of TV to determine the correct bolt diameter(M4, M6, M8)
2. Bolt length: verify adequate thread engagement with bolts or bolts/spacers combination. We recommend thread engagement by at least 5 turns.
  - Too short will not hold the TV.
  - Too long will damage the TV.

### Step 2-2 Select TV Hardware

3. Bolt and spacer combination: spacers sometimes are needed to combine with bolts for several situations as below:

## Step 2-3 Attach the TV Bracket

Ensure the wall plate is securely fastened to the wall before continuing on to Anchor the next step. These anchors are for concrete or brick walls ONLY. DO NOT use them ~ in drywall or wood studs. Drywall covering the wall must not exceed 5/8 in. ( 16mm )

Position the wall plate at your desired height, level the wall plate and mark the pilot hole locations.

Drill 3 pilot holes using a 25/64 in.(10 mm) diameter drill bit. Make sure the depth is not less than 65mm.

Install wall plate using lag bolts [A 1 ], washers [A2] and anchors [A3]. Be sure the anchors [A3] are seated flush with the concrete surface. Tighten the lag bolts [A 1 ] only until the washers [A2] are pulled firmly against the wall plate. DO NOT over-tighten the lag bolts [A 1 ].
