## PLT-13121 High Bay Occupancy Sensor and Photocell

## Specifications

- **Product Name:** High Bay Occupancy Sensor and Photocell
- **Catalog Number:** PLT-13121
- **Features:** Automate existing UFO LED high bay fixtures, motion sensor for on/off control, light level adjustment based on occupancy, and light levels

## DESCRIPTION

Automate existing UFO LED high bay fixtures by installing this microwave high bay occupancy sensor and photocell. Installing into the pre-installed port, this motion sensor turns the fixture on, off, and adjusts the light level depending on current light levels and room occupancy.

## FEATURES

- Allows fixture to turn on or off automatically depending on the amount of light or activity detected in area; see Motion Sensor Specifications for information on factory settings
- Installs into pre-installed port on select LED UFO high bays; see Compatible Fixture section for full list of fixtures.
- Optional remote control available to adjust motion sensor settings including light levels and daylight sensing; remote must be less than 49 feet from the sensor/fixture that is being controlled; see PLTS-12281 for more information

## LISTINGS

- RoHS
- IP65

## THERMAL

- -22°F to 140°F (-30° to 60°C) operating temperature

## ELECTRICAL

- **Operating Current:** 30mA
- **Microwave Power:** <0.5W

## INSTALLATION

- Remove the plastic cap from the prongs, then simply screw into the pre-installed port on select LED UFO high bays; see Compatible Fixture section for full list of fixtures.

## FAQs

**Q: How do I adjust the sensitivity of the sensor?**

A: The sensitivity of the sensor can usually be adjusted using the controls provided on the sensor itself. Refer to the user manual for specific instructions.

**Q: What is the recommended mounting height for the sensor?**

A: The recommended mounting height for optimal performance is usually specified in the product documentation. Ensure to follow these guidelines for the best results.
