## Products Parameters

### PRODUCT NAME

Pixel Stair Lighting Controller

**VOLTAGE**  
DC12V-24V

**APPLICATION**  
Control Stair LED Strips

**SUPPORT IC**  
WS2811.WS2818.5M16703.TM1903

**FUNCTION**

Adjust Pixel Qty/Delay Time/Brightness/Speed/Color

**MODEL NUMBER**  
Pixel-1

**MAX PIXEL QTY**  
512

**MATERIALS**  
ABS

## Product Details

01

### INTERFACE DESIGN

Power cord interface

02

## BUTTON DESIGN

Function buttons

## Installation Diagram

**1 PCS**

Daylight Sensor Length:1m

**2 PCS**

Sensor Cable Length:1m

**1 PCS**

Extension Cord Length:5m

## Day Light Sensors

Day light sensors OFF

Day light sensors ON

PIR sensor work both day and night

6 Levels Lux Setting

The Daylight sensor does not need to be placed visibly near the steps, but it should be able to detect light and dusk.

The sensor has 7 indicator lights. When you switch off the sensor by pressing the button (the control light at 'OFF' will turn blue), the lighting will be switched on in the daytime as well as in the evening.

When you press the button again, you switch the sensor on to the desired setting.

1x Press	the sensor is switched off
2x Press	5 Lux – the sensor will switch on when it is quite dark
3x Press	15 Lux
4x Press	30 Lux
5x Press	50 Lux
6x Press	100 Lux
7x Press	150 Lux – the sensor will switch on when it is light

## How to Use

### Brightness

Brightness have 99 levels, short press to add 1 level brightness

Digital display: HHO1 – HH99

HHO1	2% Brightness
HHO2	3% Brightness
HHO3	4% Brightness
HH99	100% Brightness

### Time Delay

Time delay have 99 levels. short press to add 1 level time delay

Digital display: LL01 – LL99

LL01	4S
LL02	6S
LL03	8S
LL99	200S

## Speed

Speed have 99 levels. short press to adjust speed Digital display: EE01 – EE99

EE01	150ms fastest speed
EE02	175ms
EE03	200ms
EE99	2600ms slowest speed

## Setting

Long press “Setting” to set Brightness, Time Delay, Speed, RGB or Single Color, Pixel Qty and Color

Short press “Setting” to enter next setting

After finished all setting, long press “Setting” to save all setting

A.RGB and Single Color

If you connect Single Color Pixel LED Strip to controller, choose “CH-1”

If you connect RGB Pixel LED Strip to controller, choose “CH-3”

## B. Brightness

Use “+” “-” to adjust brightness

## C. Time Delay

Use “+” “-” to adjust time delay

## D. Speed

Use “+” “-” to adjust speed

Please note “EE01” is fastest speed, “EE99” is slowest speed, if you want faster speed, press “-”. If you want slower speed, press “+”

## E. Pixel Qty

Set the Pixel Qty based on your strip

CC01 1 Pixel

C512 512Pixels

Use “+” “-” to adjust the qty of pixels

## F. Color

You connect RGB Pixel LED Strip, you can choose the color of the strip

PP01 the first color

PP64 the last color Use “+” “-” to choose color
