Product Usage Instructions

1. Ensure that your Poly Studio Table Microphone is connected to the compatible Poly Studio device.
2. Place the microphone on a stable surface within reach of the participants.
3. Adjust the microphone's position and angle to capture optimal audio quality.
4. Make sure the microphone is not obstructed by any objects or obstructions that could affect sound pickup.
5. Once the microphone is properly positioned, it is ready to use. The Poly Studio device will automatically detect and utilize the microphone for audio input during video conferencing or other audio applications.
6. If you encounter any issues or need assistance, refer to the provided support links or contact Poly support for further guidance.
