Description

The paD100-LeDK provides a mappable key-switch input making it ideal for key control of a variety of system functions. The paD100LeDK provides mappable red Led which can be used to indicate a variety of status conditions.

Application The pa D100-LeDK is compatible with potter's iPAQ and face/arc series addressable fire alarm control panels. It installs on a single gang box.

Setting the Address

The paD100-LeDK uses one SLC address assigned to the device. The address is set using the DIp switch located on the back of the paD100LeDK device.

Before connecting a device to the SLC loop, take the following precautions to prevent potential damage to the panel or device:
1. power to the device is removed.
2. Field wiring is correctly installed.
3. Field wiring has no open or short circuits.
