Product Usage Instructions

Warning and Precautions
Before proceeding with the update, ensure to read all instructions carefully and use a blank flash drive formatted in FAT32 from a reputable brand. Using an unreliable flash drive can lead to data corruption.

Download Update Files
Download the update files (71mb) from: **Update Files Download**

USB Update Instructions

1. Download the CP-71W Wireless Android Auto update files and save them to your computer.
2. Unzip the downloaded file to an empty USB flash drive.
3. Insert the USB flash drive into the back USB port of the device with the radio powered on.
4. Access the Settings menu, scroll down, and select Serial & Version.
5. Click the Update button and follow the on-screen instructions to complete the update.
6. Wait for approximately 2 minutes until the update process is complete.
7. After the update, verify its success by checking if the Android Auto icon appears on the home screen.

Frequently Asked Questions (FAQ):

- **Q: Can I use any USB flash drive for this update?**
  - A: It is recommended to use a minimum 16GB USB Type-A flash drive with USB 2.0 or 3.0 specifications from reliable brands like SanDisk or Samsung to ensure smooth data transfer and system compatibility.
- **Q: How can I check if the update was successful?**

  - A: After completing the update process, verify its success by checking if the Android Auto icon appears on the home screen of your CP-71W device.

Power Acoustik CP-71W – Wireless Android Auto Update (June 2024)

WARNING: Before attempting this update, please read these instructions carefully and don't skip any steps, and be sure to use a blank flash drive (FAT32 format) from a reputable brand (SanDisk, Samsung, etc). If the flash drive is not empty, be sure to format it. You can find instructions on how to format a flash drive HERE,

A minimum 16GB USB Type-A flash drive with USB 2.0 or 3.0 is required. Using a flash drive with unknown USB specification will diminish data transfer and can corrupt the system processors. Use reliable name-brand USB flash drives. We use and recommend SanDisk Crozer, available at Walmart.

USB Update Instructions

1. Download the CP-71W Wireless Android Auto update files and save them to your computer.

2. Unzip the CP-71W_WirelessAndroidAuto_Update.zip file to an empty USB flash drive.

3. The files you extracted to your USB flash drive should look like this

Name	^	Size
ISPBOOOT.BIN		100.3 MB
∨ 📁 update		--
st25mcu.bin		115 KB

4. With the radio powered on, insert the USB flash drive into the back USB port.

5. You may get a "No data can be played" message, but ignore and go back to the Home screen.

6. Click on the Settings button and scroll down the menu and select Serial & Version.

7. Click the Update button, and you will see a window with New Firmware Version pop up and click Update to begin the updating process.

8. Please wait approximately 2 minutes, you will see multiple different screens until you finally see the initial setup screen.

9. Once you complete the quick setup, your CP-71W is now fully updated!

10. You can verify that the update was successful by going to the home screen and seeing if the Android Auto icon has now appeared.
