### power soak Advanced Wash Insert

## PRODUCT FEATURES

The AWI minimizes impact of washed wares and noise while creating a gentle, effective, fast and consistent wash action. The system is manufactured of ultra-high molecular plastic (UHMW) and stainless steel for optimal performance. Flow guides, which manage the motion of the water, are also made of UHMW plastic and fit easily into each rib section to create an optimally curved inner tank lining.

- **Gentler and Quieter:** The use of an AWI provides for a gentler and quieter washing environment.
- **Simple Installation:** Installs in minutes, usually without the need of tools.
- **Greater Flexibility:** A flexible tank divider can be used to create a utensil area or two larger partitioned section for dedicated usage.

Unified Brands and its Groen, Randell, Avtec, Power Soak, and CapKold product lines have leading industry positions in cooking equipment, cook-chill production systems, custom fabrication, foodservice refrigeration, ventilation, conveyor systems, and continuous motion ware washing systems. Unified Brands has operations in Michigan and Mississippi. © 2022 Unified Brands. All Rights Reserved. Printed in the USA. 04/19
