## prado HW001 Window Handle Installation Guide

1

Use an outdoor connection box for the wire connections.  
Make sure the power is turned off.

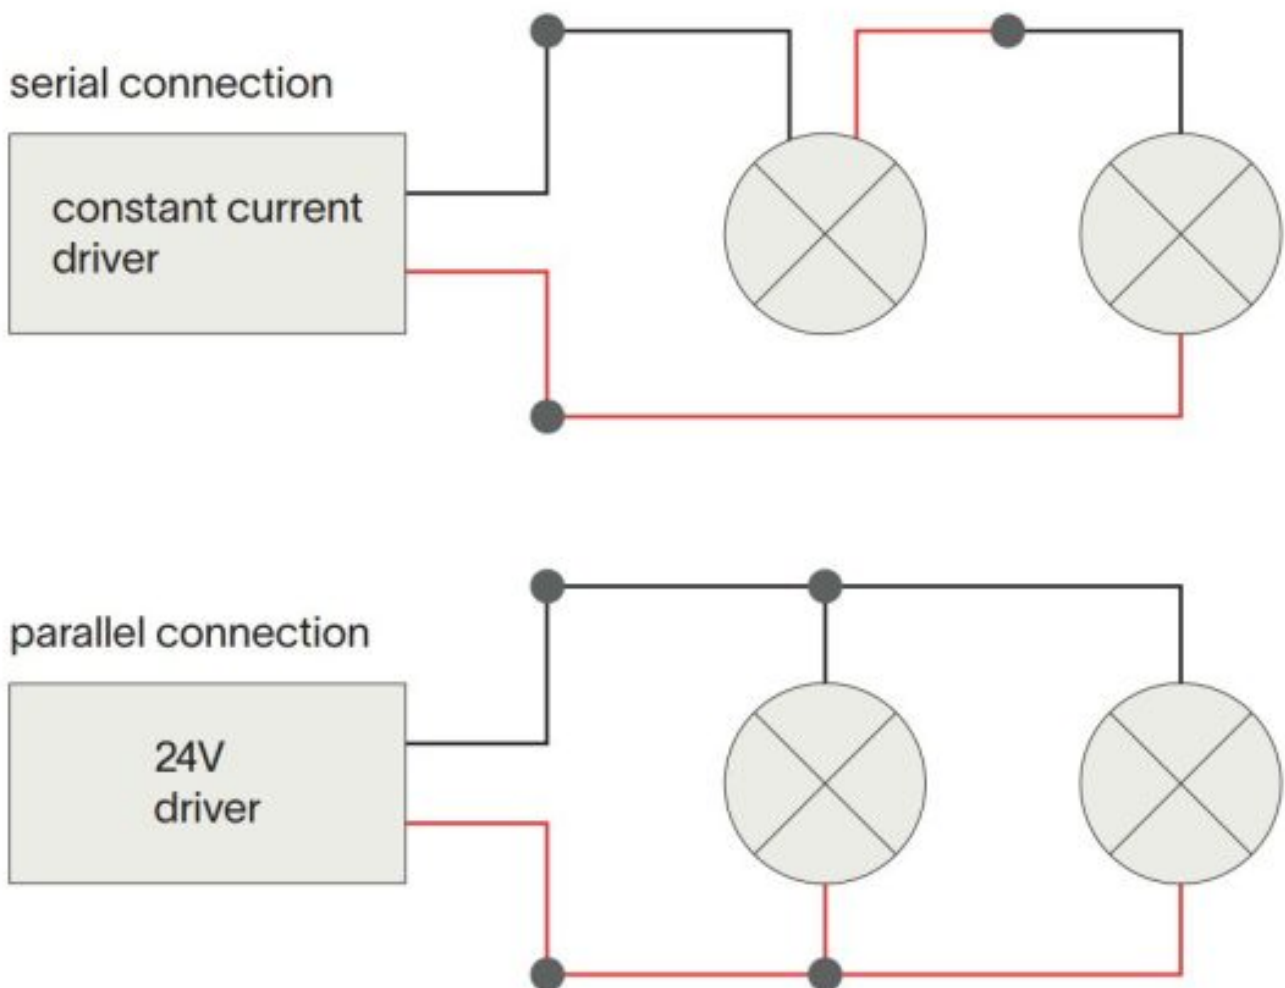

Make the connection inside the box using a waterproof connector (min IP67).

Combine with prado LED-driver , respect polarity:

- for constant current: serial connection
- for 24V driver: parallel connection

The installer is responsible for using the correct wire section and must consider the maximum cable length to ensure safe and efficient system operation. Incorrect wire choice can lead to overheating, voltage drop, and equipment damage.

### **Important Note for the Installer:**

Ensure the external electrical connection for this fixture is waterproof. It is the installer's responsibility to use materials and techniques that meet IP standards and prevent water ingress. Failure to waterproof the connection may lead to fixture damage, electric shock, or short circuits. Any risks or damages from improper waterproofing are the installer's responsibility.

We strongly recommend using appropriate water proofing materials for the installation environment.

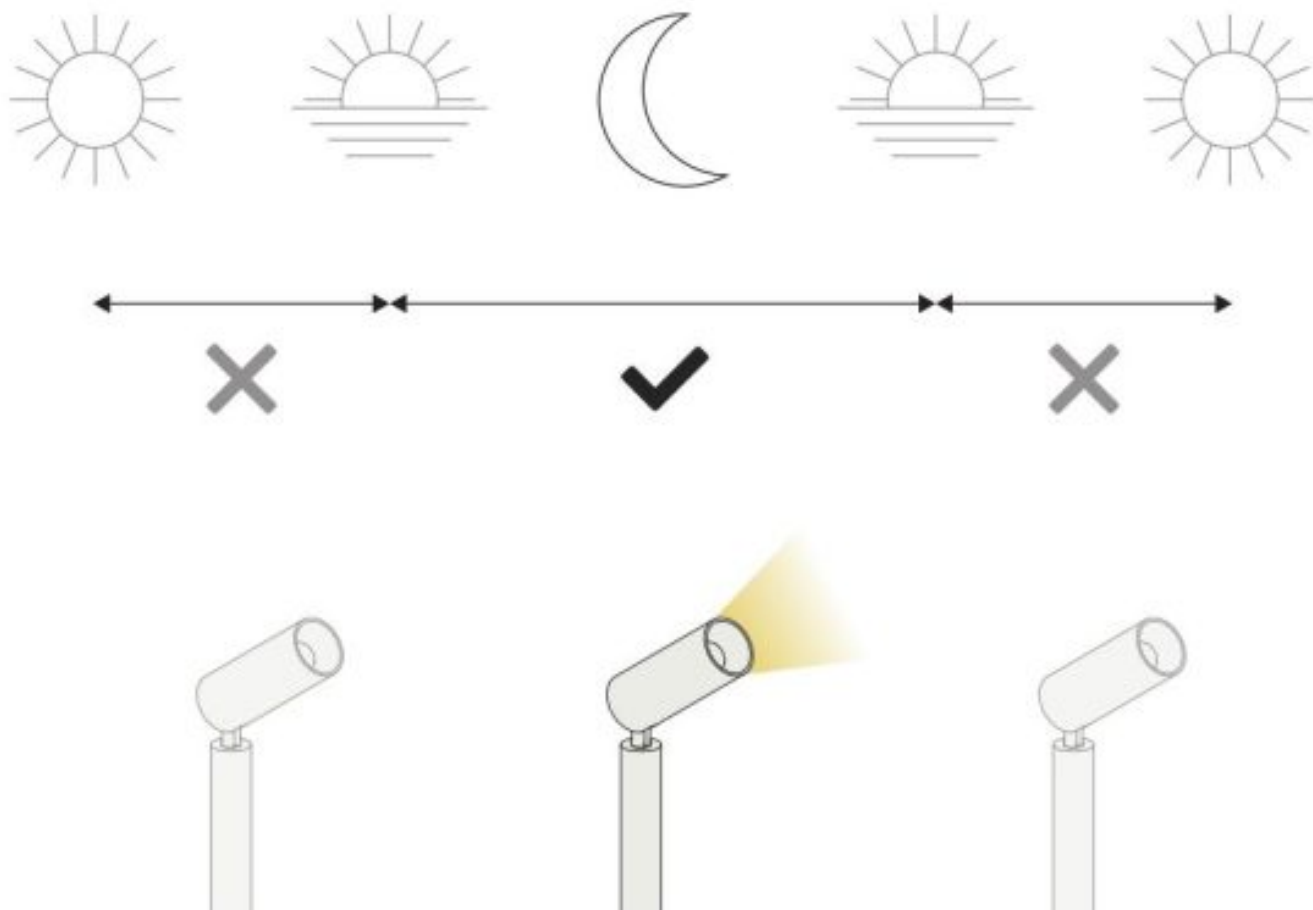

**Install the fixture.**

4

**Twist the fixture as desired and turn the power back on.**

**To prevent overheating, do not light the fixture in the sunlight.**

Thank you for choosing prado

outdoor pin up  
installation instruction

1

Use an outdoor connection box for the wire connections.  
Make sure the power is turned off.

2

Make the connection inside the box using a waterproof  
connection (see fig. 1).

• Connect with prado 220-volt power, respecting polarity.

• For constant current serial connection.

• For 24V three parallel connection.

The installer is responsible for using the correct wire  
section and must consider the maximum cable length.

To ensure safe and efficient system operation, incorrect  
wire choice can lead to overheating, voltage drop, and  
equipment damage.

Important Note for the installer:

Ensure the correct electrical connection for the future

is made in the future. Be responsible for using

materials and techniques that meet IP standards and

prevent water ingress. Failure to waterproof the

connection may lead to future damage, electric shock,

or short circuits. Any risk or damage from improper

wiring is the installer's responsibility.

We strongly recommend using appropriate water-

proofing materials for the installation environment.

3

Install the fixture.

4

Twist the fixture as desired and turn the power back on.

5

To prevent overheating, do not light the fixture in the

daylight.

Thank you for choosing prado.
