PRIME Smart Outlets Plus Remote Control

Congratulations

on your purchase of PRIME Smart  outlets + Remote Control! After a fast and free download, the Prime Wire and Cable, Inc . App will walk you through the complete setup process for your newSmart  outlets . The Remote is preprogrammed and will work out of the box.

How do I re-sync the remote if it does not switch a Smart Outlet ON or OFF?

- Only plug one Smart Outlet into a properly grounded outlet at a time.
- Press ON button on remote until LED on Smart to outlet flashes.
- Unplug_ Smart Outlet and repeat with other Smart Outlet if needed. If re-sync fails, push power button on Smart Outlet ON and push OFF button on remote until Smart Outlet power button flashes. Repeat re-sync.
- Note that you may have to replace the CR.203.2:, 3V battery in the remote by removing the screw and pushing the tabs on each side to pull out the battery tray.
- This remote does not work with any other Smart Outlets, only with this 2-pack system.

Prime warrants this product to be free from manufacturing defects for a period of one year from the original date of purchase (“warranty period”). This warranty is limited to the repair or replacement of this product only and Prime is not liable for any consequential or incidental damage to other products that may be used with this unit. This warranty is effective only if such unit is returned to Prime not later than thirty (30) days after the expiration of the warranty period. Warranty is void if damage is due to neglect, misuse, alteration, modification, improper installation, or repair by other than Prime. This warranty is in lieu of all other warranties express or implied. Some provinces do not allow limitations on how long an implied warranty lasts or permit the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. It is our experience that a product that fails prematurely due to a manufacturing defect in materials or workmanship, will generally do so very early in the product’s life cycle, often the first or second time the product is used. Products that are returned for warranty inspection after months or years of continuous reliable service are usually the result of normal wear and tear, which is not considered a defect in materials or workmanship and therefore is not covered by the warranty. This warranty gives you specific rights, and you may also have other rights which vary from province to province. If unit should prove defective within the warranty period, return within the time period set forth above prepaid with the original purchase receipt to:

FCC REGULATORY STATEMENT

WARNING

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

This device complies with part 15 of the FCC rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Notes

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

IC REGULATORY STATEMENT

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

This device complies with Industry Canada license-exempt RSS standard(s).

Operation is subject to the following two conditions;

1. This device may not cause interference, and
2. This device must accept any interference, including interference that may cause undesired operation of this device.

RF exposure statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off all on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from the one to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
