WARRANTY

This replacement filter cartridge is warranted to be free from defects in material and manufacture for one (1) year from the date of purchase. This warranty does not cover any failures resulting from abuse, misuse, alteration, or damage not caused by the manufacturer or failure to follow proper installation and use instructions. If the product fails to satisfy this limited warranty during the described period, the manufacturer will replace or refund the purchase price of the product. This warranty does not cover additional costs such as labor

SAFETY INFORMATION

WARNING

To reduce the risk of property damage due to water leakage, this filter **MUST** be installed in accordance with the manufacturers specifications and instructions. Installation shall comply with applicable state and local regulations. For cold water applications only. Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts. This filter unit must be replaced every 6 months, at the rated capacity, or sooner if reduced water flow occurs. Failure to follow instructions and operating specifications will void your warranty. Further, manufacturer assumes no responsibility or liability for damages arising out of misuse of the product. Protect from freezing

INSTALLATION OVERVIEW

- Locate water filter and remove the existing filter by rotating it counter clockwise.

- Carefully remove the sanitary cap from the top of the new filter.

- Align the start arrow on the water filter label with the arrow on the refrigerator filter housing.

- Apply slight upward pressure and rotate the filter clockwise until the Stop arrow on the front of the filter label is aligned with the arrow on the refrigerator housing. Ensure the filter is fully installed in refrigerator housing a full 1/4 turn.

Note: Please ensure the filter is fully installed as it is required to activate the internal water valve. If the filter isn't properly installed, you may experience a slow flow or a chattering noise. If this occurs, please uninstall and reinstall the filter ensuring the filter is fully installed. Ejerza una

- Run approximately 2.5 gallons of water from the dispenser periodically to clear the system and to receive a good flow. If the water flow is slower than usual, please repeat Steps 3 and

Note: Initial flow rate may be slower than expected. Full flow rate should be restored within 24-36 hours.

- Inspect the filter for any noticeable leaks. If leaks are detected, please repeat Steps 3 and 4.

- To reset the filter monitor light, please refer to your refrigerator owner's manual for specific instructions.

- Locate the included Water Filter Replacement Calendar and follow the instructions on the label.
