Package List

Projector	Power Lead	AV Signal Cable	Remote Control (Battery not included)	HDMI Cable
1 PCS	1 PCS	1 PCS	1 PCS	1 PCS

Remote Control

Cautions:

- Do not submerge the remote control in the water.
- Do not put the remote control near fire or in wet / hot places.
- Do not use old and new batteries together in the remote control.
- Please take the batteries out if not using the remote control for a long time to avoid battery leakage.
- Please point the remote control at the projector while use, cause it contains an IR receiver.
- Please use the remote control within 6 meters distance and 30 degree angle.

Installation

1. Install method

The projector can be hanged on the ceiling with a special hanger frame, and keep the projector at a height where its lens is axial symmetry to the screen. If this is not possible, use the keystone correction function to adjust the image.

1. Front projection Ceiling mount

2. Rear projection Ceiling mount

3. Front projection Table mount

4. Rear projection Table mount

2. Projector distance and size

1. screen size

* Maximum support 300" projection and 5M projection distance.

* We advise you that the best projection size is: 43"-120", and the best projection distance is 1.26M-3.5M.

3. Install on the ceiling

1. Ceiling
2. Bracket

1. Height adjustment screw

1. Connect the power cable to the projector.

Mains Socket

1. Indicator light

2. Turn On: After connecting the power, please wait for 3-5 seconds, the indicator light turns red to green, and then green to red again, at this time you can press the power on / off button once and the projector will start normally.

3. Turn Off: Press the power on / off button once and it will display whether to make it off. If you want to turn it off, just press the power button again, and the projector will be off immediately. Otherwise, there is no need to press the power button a second time.

Amage Adjustment

1. Manual keystone correction(Maximum: $\pm 15^\circ$)

Slowly move the keystone correction ring on the top of the projector until the image change to be a rectangle. The keystone correction can be adjusted up to of 5° (vertical).

1. Keystone correction

2. Focus adjustment

Rotate the focus ring slowly, at the same time check the focus point carefully. The best focus point for the lens would be where the image is most clear.

1. Focus

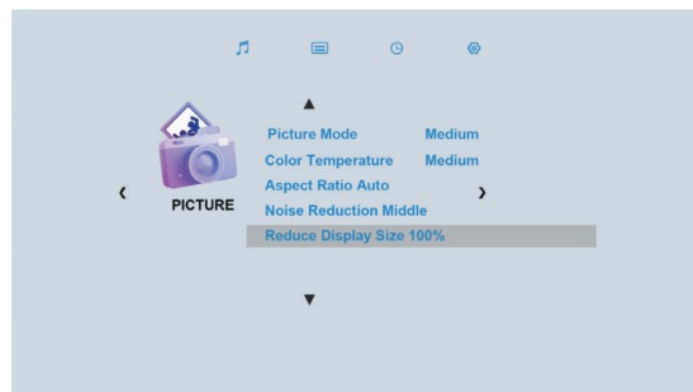

Note:

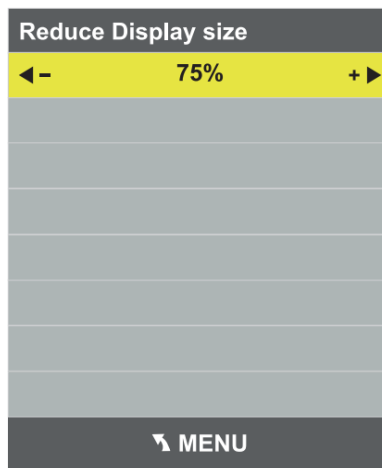

If it is still blurry, please try to adjust the projection distance.

3. ZOOM function

1 Press the “Menu Setting” and choose “PICTURE”, then click the function of “Reduce Display Size 100%”.

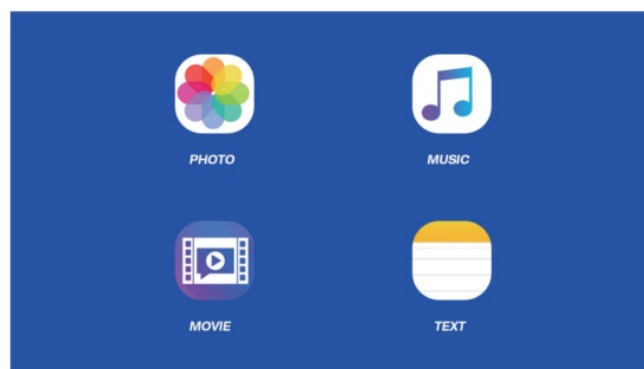

2 Then you can adjust the picture ratio 75-100%, just choose your favorite mode, you can enjoy the ZOOM function's fun.

Multimedia boot screen

The projector's normal start-up screen is as follows:

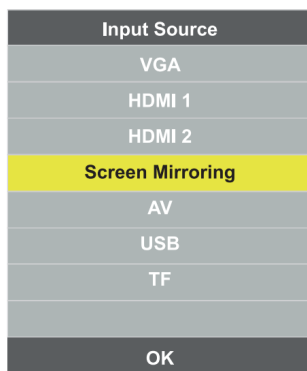

How to Connect Smartphone?

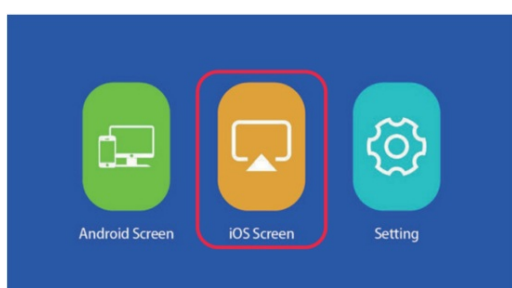

Wireless Connection

1 iOS screen (ios devices have 3 methods to connect)

1) Wireless connection without Wi-Fi router(for iOS devices)

Step 1: Projector doesn't need to connect to the Wi-Fi router.

Step 2: Click the "Interfaces Option" button and choose the "Screen Mirroring" with "ios Screen"(you can see the projector's name and password when you choose ios screen mirroring on the projector)

Step 3: Turn on Wi-Fi on your iOS device and search for the network name of the projector and put the password into connecting, it will show connect successfully.

Step 4: Turn on the 'Screen Mirroring' function on your iOS device, select the device name of the projector.

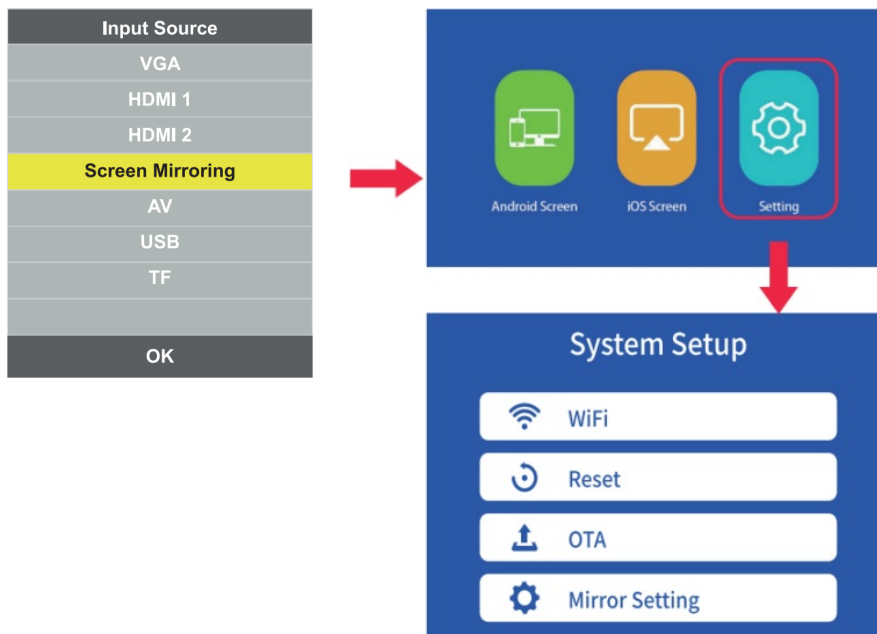

Step 5: After the above steps, you can play the video of your mobile phone synchronously as

2) Wireless connection with WiFi router(for CS devices)

Step 1: Click "Interfaces Selection" and choose "Screen Mirroring", enter the "Setting" mode and select the "Wi-Fi search" function, connect the router that you wanted and put in passwords.

Step 2: Open your smartphone's Wi-Fi and connect to the same router.

Step 3: At the same time, make your smartphone turn on the "screen mirroring" function, in this way, you can start to operate as you like.

WiFi	Connect the projector to Wi-Fi router
Reset	Restore the Screen Mirroring function factory Settings
OTA	Online upgrade
Mirror Setting	Mirror mode/Airplay mode

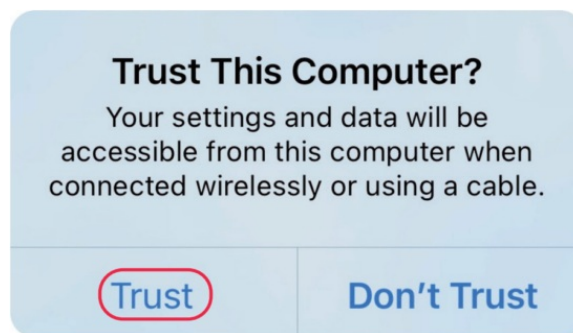

3) Wired connection(for iOS devices)

Step 1: Step 1: Click the “Interfaces Selection” button and select the “Screen Mirroring” function.

Step 2: Connect your iOS device to the projector USB port with a USB cable.

Step 3: For the first time your iOS device will pop up a trust prompt. Confirm “Trust”, then the screen mirroring will start.

2 Android screen (Android devices have 2 methods to connect)

1) Wireless connection (for Android devices)

Step 1: Click the “Interfaces Option” button and choose the “Screen Mirroring” function. (enter “Android Screen” and you can see the projector’s name and password when you choose screen mirroring).

Step 2: Turn on Wi-Fi on your Andriod device and search for the network name of the projector and put the password into connecting.

Step 3: Turn on the “Wireless Projection” function on your Andnod smartphone, select and connect that device name of the projector.

Step 4: Now you can start to use the screen mirroring function with your phone.

Note:

- Some Android devices may not support screen mirroring due to the compatibility.”
- Some Android devices may only transfer the display without audio due to the protocol restrictions

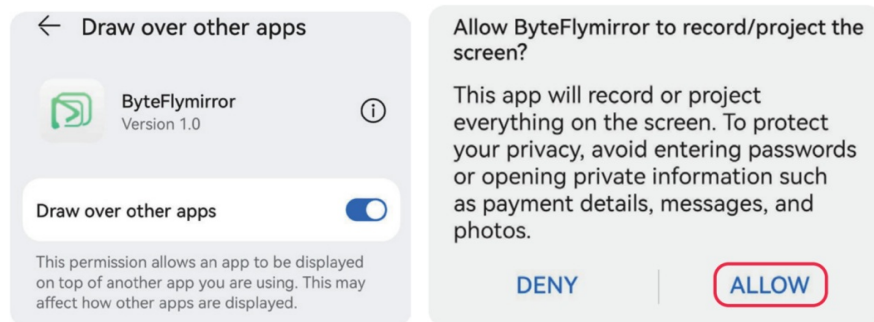

2) Wired connection (for Android devices)

Step 1: Click the “Interfaces Option” button and choose the “Screen Mirroring” function.

Step 2: According to the prompt, download and install the “ByteFlymirror” APP.

Step 3: Allow ByteFlymirror to record / project the screen.

Step 4: Now you can start to use the wired connection function with your phone.

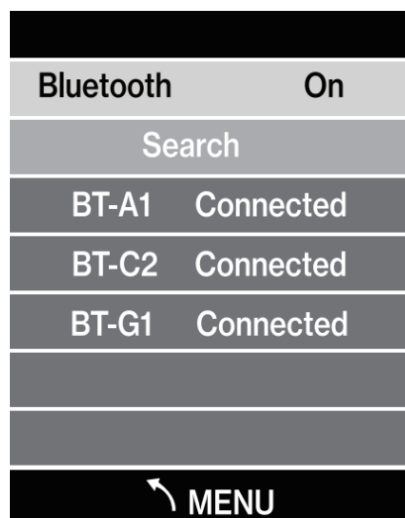

3 Bluetooth connection

1. Press the “Menu Setting” and choose “SOUND” & Bluetooth On”, start to search the device and try to connect.

2. When it shows the connection is successful, you could use your device.

Please Kindly Know That:

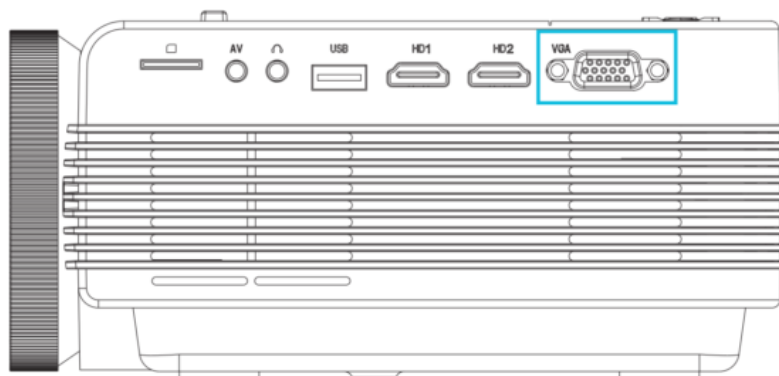

It is suitable for devices such as Bluetooth headsets, Bluetooth speakers, various Bluetooth devices, etc...

Wireless connect function which is more convenient for your daily life!

User Operating Guidance

How to connect VGA?

Step 1: Click interfaces selection button and select VGA.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by the manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.
