Important Safety Warning

CAUTION:

1. To prevent the risk of fire or electric shock, install in a temperature and humidity-controlled indoor area free of conductive contaminants. (See the specifications for the acceptable temperature and humidity range.)
2. To reduce the risk of overheating the UPS, DO NOT cover the UPS' cooling vents and avoid exposing the unit to direct sunlight or installing the unit near heat-emitting appliances such as space heaters or furnaces.
3. DO NOT attach non-computer-related items, such as medical equipment, life-support equipment, microwave ovens, or vacuum cleaners to UPS.
4. DO NOT plug the UPS input into its own output.
5. DO NOT allow liquids or any foreign object to enter the UPS. DO NOT place beverages or any other liquid-containing vessels on or near the unit.
6. In the event of an emergency, press the OFF button and disconnect the power cord from the AC power supply to properly disable the UPS.
7. DO NOT attach a power strip or surge suppressor to the UPS.
8. Attention hazardous through electric shock. Also with the disconnection of this unit from the mains, hazardous voltage still may be accessible through the supply from the battery. The battery supply should be therefore disconnected in the plus and minus pole at the quick connectors of the battery when maintenance or service work inside the UPS is necessary.
9. Servicing of batteries should be performed or supervised by personnel knowledgeable of batteries and the required precautions. Keep unauthorized personnel away from batteries.
10. When replacing the batteries, use the same number and type of batteries.
11. The internal battery voltage is 12VDC. Sealed, lead-acid, 6-cell battery.
12. DO NOT dispose of batteries in a fire. The battery may explode. DO NOT open or mutilate the battery or batteries. Released electrolyte is harmful to the skin and eyes.
13. Unplug the UPS prior to cleaning and DO NOT use liquid or spray detergent.
14. A battery can present a risk of electric shock and high short-circuit current. The following precaution should be observed before replacing batteries:
 - i. Remove watches, rings, or other metal objects.

- ii. Use tools with insulated handles.
- iii. Wear rubber gloves and boots.
- iv. Do not lay tools or metal parts on top of batteries.
- v. Disconnect charging source prior to connecting or disconnecting batteries terminal.

WARNING:

- 1. DO NOT modify the UPS input cable.
- 2. Consult your dealer if the UPS input cable connector does not match the utility receptacle.
- 3. The UPS must be grounded while in use. Operate the UPS only from a properly grounded AC outlet (2 wire plus ground).
- 4. Turn off the UPS before unplugging it from the AC outlet.

Overview

PRO1250SFC/PRO1250SFCU

Front View

Rear View

Legend:

1. Power Switch 2. Fault Indicator: Red LED Lighting 3. Battery Mode Indicator: Yellow LED Flashing 4. AC Mode Indicator: Green LED Lighting	5. Power AC Input 6. USB Port (only for PROI250SFCU) 7. RJ45 Ports (In & Out) 8. Backup Outlets
---	--

Installation & Initial Startup

Note:

Before installation, please inspect the unit. Be sure that nothing inside the package is damaged.

Connect to Utility and Charging

Connect the AC Input Cord from the wall outlet to the UPS. For the best result, suggest to charge the battery at least 6 hours before initial use. The unit charges its battery while connecting to the utility.

Placement & Storage Conditions

Install the UPS in a protected area that is free of excessive dust and has adequate air flow. Please place the UPS away from other units at least 20cm to avoid interference. DO NOT operate the UPS where the temperature and humidity is outside the specific limits. (Please check the specs for the limitations).

Connect the Loads

Plug in the loads to output receptacles on the rear panel of the UPS. Simply turn on the power switch of UPS unit, and then devices connected to the UPS will be protected by UPS unit.

**CAUTION:**

NEVER connect a laser printer or scanner to the UPS unit. This may cause damage of the unit.

Data Line Surge Protection (Only for the model with Rj11/R/45)

Connect a single network/telephone/fax line into a surge-protected “IN” outlet on the back panel of the UPS unit. Connect from the “OUT” outlet with another network/telephone/fax line cable.

Connect Communication Cable (Only for the model with a USB port)

To allow for unattended UPS shutdown/start-up and status monitoring, connect the communication cable to one end to the USB port and the other to the communication port of your PC. With the monitoring software installed, you can schedule UPS shutdown/start-up and monitor UPS status through PC.

Turn On/Off the Unit

Turn on the UPS unit by pressing the power switch. Turn off the UPS unit by pressing again the power switch.

Software Download & Installation**Note:**

Only for model with USB port.

Please follow steps below to download and install monitoring software:

1. Go to the website <http://www.power-software-download.com>
2. Click ViewPower software icon and then choose your required OS to download the software.
3. Follow the on-screen instruction to install the software.
4. When your computer restarts, the monitoring software will appear as orange plug icon located in the system tray, near the clock.
5. For UPS with HID-compliant USB Port (optional), you may safely shut down the UPS during power failure simply by connecting to a computer with pre-installed Windows/ Linux/ Mac OS through the USB port even without monitoring software.

Storage and Maintenance**Storage**

Before storing, charge the UPS at least 6~8 hours. Store the UPS covered and upright in a cool, dry location. During storage, recharge the battery in accordance with the following table:

STORAGE TEMPERATURE	RECHARGE FREQUENCY	CHARGING DURATION
-25°C – 40°C	Every 3 months	1-2 hours
40°C – 40°C	Every 2 months	1-2 hours

Maintenance

The UPS system operates with hazardous voltages. Repairs may be carried out only by qualified maintenance personnel.

Even after the unit is disconnected from the mains, components inside the UPS system are still connected to the battery packs which are potentially dangerous.

Only persons are adequately familiar with batteries and with the required precautionary measures may replace batteries and supervise operations.

Unauthorized persons must be kept well away from the batteries.

Batteries may cause electric shock and have a high short-circuit current. Please remove all wristwatches, rings and other metal personal objects before maintenance or repair, and only use tools with insulated grips and handles for maintaining or repairing.

When replace the batteries, install the same number and same type of batteries.

Do not attempt to dispose of batteries by burning them. This could cause a battery explosion. The batteries must be rightly deposited according to local regulations.

Do not open or destroy batteries. Escaping electrolytes can cause injury to the skin and eyes. It may be toxic.

Do not disassemble the UPS system.

Troubleshooting

Use the table below to solve minor problems.

PROBLEM	POSSIBLE CAUSE	SOLUTIONS
No LED display on the front panel	Low battery	Charge the UPS at least 6 hours
	Battery fault	Replace the battery with the same type of battery
	The UPS is not turned on	Press the power switch again to turn on the UPS
The alarm continuously sounds when the main is normal	The UPS is overload	Remove some loads first. Before reconnecting equipment, please verify that the load matches the UPS capability specified in the specs.
When power fails, backup time is shortening	The UPS is overload	Remove some critical load
	The battery voltage is too low	Charge the UPS at least 6 hours
	Battery defect. It might be due to a high-temperature operation environment or improper operation to the battery	Replace the battery with the same type of battery
The main is normal but LED is flashing	The power cord is loose	Reconnect the power cord properly

Specifications

MODEL	PRO1250SFC/SPCU
Capacity	1250 VA
INPUT	
Voltage Range	140 – 300VAC \pm 5%
Frequency	50Hz/60Hz (Auto-sensing)
Phase	Single + GND
OUTPUT	
Voltage Range	230VAC + 12%-14%
Battery Mode	230VAC \pm 10%
Frequency	50Hz \pm 1% (Battery Mode)
Waveform	Simulated Sine Wave (Battery Mode), Sine Wave (AC Mode)
Transfer Time	2ms typical
BATTERY	
Type & Number	12 V/ 8.2 AH x 2
Backup Time	Up to 40 mins depending on the load
Charging Time	2 – 4 hours recover to 90% capacity
PROTECTION/MONITORING	

Short Circuit Protection	Yes (Line Mode and Battery Mode)
Surge Protection	Yes
Alarm	Audible Et Visual
UPS Protection	Load Auto Sensing and Abnormal Protection
Overload Protection	Line Mode -120 – 130% 5 mins change to fault mode >130% change to fault mode immediately Battery Mode -110 -120% alarm & shutdown in 5 secs >120% shutdown immediately
Intelligent Battery	Prevent overcharging of battery
Management	Protect battery and prolong battery life
Data Line Surge Protection	RJ45
SOFTWARE MONITORING	
USB Connector in	AC Fault, Battery Low, Shutdown UPS
Software 41	Support Windows® 7/ 8/ 10, Linux, and Mac
GENERAL	
Noise Level	< 40dB
Temperature	0°C – 40°C
Humidity	0 – 90%
Power Factor	Up to 0.7
Built-in AVR	TRUE Full AVR (3 steps)
Dimensions DxWxH	320 x 130 x 182 (mm)
Weight (kg)	9.2
