PROSLAT 63020 ProRack Optional Shelf

Product Information

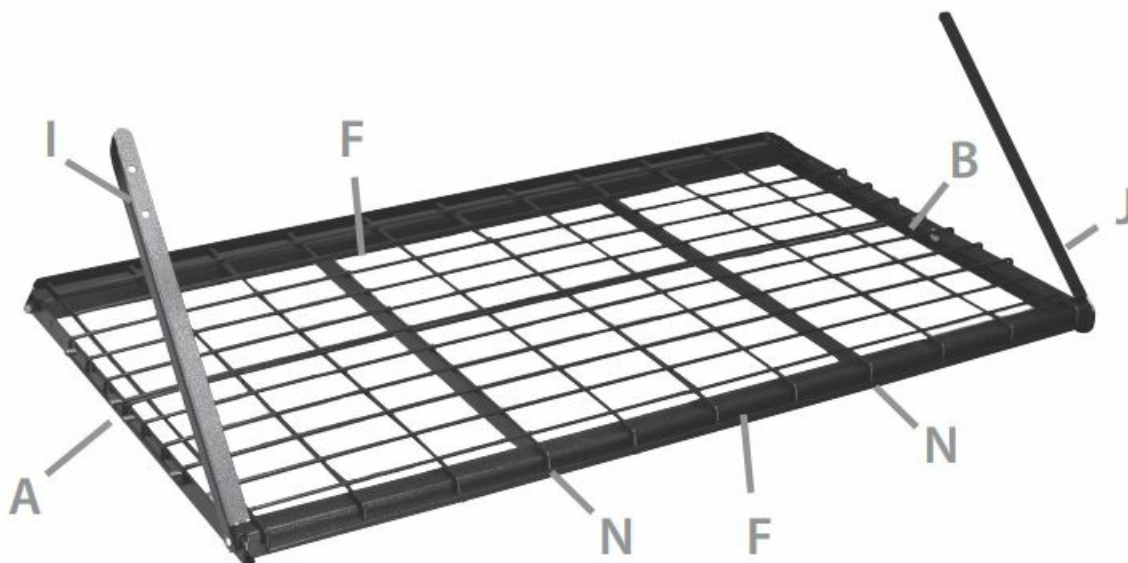

This product is a shelf or tablette designed for assembly and installation. It is part of the ProRack system, manufactured by Proslat. The shelf is intended to be mounted on a wall using wall studs for proper support. It comes with various parts including A, B, C, D, E, F, I, J, N, and grill support bars.

Product Usage Instructions

1. Before starting the assembly process, ensure that you have all the necessary tools required: 2 X (tool name)
2. Read and understand the warning provided in the manual regarding the proper installation of the shelf into wall studs for safety.
3. Start by installing part I on the inside of parts C and E using the existing bolt. Repeat the same process on the other side with part J.
4. Install part A between parts C and D using the existing bolt. Repeat the same process on the other side with part B.
5. Connect one of the crossmembers F to parts I and A at the front of the shelf.
6. Then, connect the same crossmember F to parts J and B at the front of the shelf.
7. Connect the rear crossmember F by overlapping it with parts A and B. Use the last hole of parts A and B.
8. Install two grill support bars N onto the shelf.
9. Install the grids onto the shelf, ensuring that they overlap all four support bars.
10. Finally, install lock pins at both ends of the shelf for added stability and safety.

If you encounter any difficulties during the assembly process or have any questions, please contact Proslat customer support at 1-888-691-2944.
