BT3 Device Connection
Keyboard Charging
When the battery is too low, the low battery indicator will turn red and flash quickly. Please connect to the power supply to charge in time to ensure that the keyboard has sufficient power to meet normal work.

If the battery of the keyboard is too low, there will be delays and freezes and other problems in typing, which affect normal use.

Power indicator turns red while charging, then turn off after fully charged.

2. When you use the keyboard again, you only need to press any key, and the keyboard will wake up within 3 seconds. The indicator will light up again and starts to work.

FAQ

1. **The tablet cannot connect to the Bluetooth keyboard?**
   1. First, check if the Bluetooth keyboard is in pairing mode(Long press /button for 3-5 seconds, and the corresponding Bluetooth indicator light will continuously flash, indicating successful Bluetooth pairing). Then, enable Bluetooth on the tablet and search "ProtoArc XK01 TP" to establish the connection.
   2. Verify that the Bluetooth keyboard has sufficient battery power. Insufficient battery power can also prevent the connection. Please charge the Bluetooth keyboard before use.
2. **The keyboard indicator light keeps flashing during use?**
   When the keyboard indicator light keeps flashing during use, it indicates that the battery is running low. Please recharge the keyboard as soon as possible.
3. **The device shows that the Bluetooth keyboard is disconnected.**
   If the Bluetooth keyboard remains unused for a period of time, the device may automatically disable the Bluetooth function to save power. Press any key on the keyboard to wake it up, and the Bluetooth connection will be restored automatically.

Packing List

- 1* Foldable Bluetooth Keyboard
