Product Usage Instructions

Installation

Tools Required: Drill, screws, masonry anchors (if necessary)

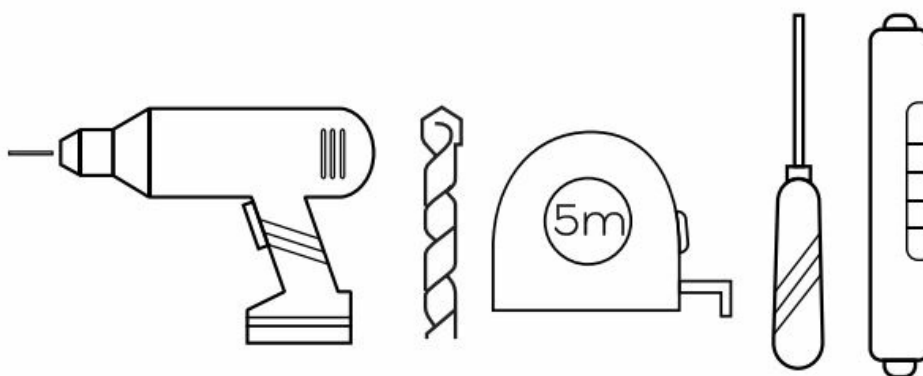

1. Position the mounting flanges on the wall and mark hole locations.
2. For wood or solid backing applications, drill 1/8" pilot holes through the shower wall into the wood or metal stud. If the wall is tiled, start with a 1/8" pilot hole through the tile, then switch to a 5/16" masonry tile drill bit.
3. Install screws through the mounting flange into the wood/metal stud or bracing. Use masonry anchors if needed.
4. Once the ErgoSafetyBar is securely fastened, align the cover plate locking tabs with slots in the flange. Push the cover against the mounting until it locks.
