Class T Amplifier

The PFA200 uses a Class-T audio amplifier IC for low distortion and acoustically accurate reproduction of music.

Tone/Direct switching allows for customized listening via separate bass and treble adjustments — or the original signal can be passed through without enhancement.

The built-in loudspeaker protection circuit triggers when the amplifier is turned on to protect speakers from high volume bursts of audio.

Over-voltage protection circuit shuts down the amplifier if input voltage exceeds 14.4 V DC.

State-of-the-art design using surface mount components and advanced engineering for proven performance, reduced signal interference, and long operational life.

Specifications:

Input power: DC 9~14.4V 2A

Output Power: 60 W

Speaker impedance: 2-8Ω

Frequency response: 20Hz-20kHz

Total harmonic distortion: 0.4%

SNR: 80dB

Front Inputs: 3.5mm (1/8")
Rear Outputs: Speaker, RCA L/R, 1/4" Mic
