PYLE PWMA60UW Multi-functional Voice Amplifier

Introduction

Congratulations! Please read this manual carefully so that you can use this product easily. We try our best to make it accurate; errors may still exist in this manual, so please tell us your suggestions. specification subject to change without notice.

Product Description

Surprisingly powerful and iPod and USB support are integrated in. includes a Lavalier headset microphone. To view the full image, [click here](#). Thanks to USB support, you may play recordings and music directly from your computer. You can choose tunes to play, stop, and search them on your USB stick. To view the full image, [click here](#).

Portable, lightweight PA system with headset microphone

The PWMA60UW is a portable PA system that is small, light and supports USB. It also comes with a headset Lavalier microphone. You wouldn't believe how loud and clear it is considering its diminutive size, making it ideal for directing people through busy, noisy areas or making sure you are heard in huge gatherings or crowds. available in silver, white, or black.

Play audio files and recordings with an iPod or USB

Thanks to USB capability, you can play music and recordings over the speaker. To do this, simply transfer your

files from your computer to a USB stick and press play. The unit has forward and backward track selector controls as well as a seek option so you can quickly identify the part of the track you wish to play, making it simple to choose between several files.

With the AUX audio input jack, the system also supports iPods and other external music devices. All you need is a double-sided 3.5mm male stereo cable (not provided).

Simple to Carry and Use

Wearing the system with the provided adjustable belt strap makes carrying it around with you simple. In order to prevent your hands from growing tired from holding a microphone all day, it also has a headset lavalier microphone. The system is lightweight and small enough that you won't even realize you're wearing it, which is the best part.

12 hours of use using built-in rechargeable lithium batteries

Since the device is powered by a rechargeable battery, you'll even save money by not having to purchase batteries repeatedly. Your system will be ready to use once more for up to 12 hours if you simply insert the power adapter into the speaker unit.

Features

Long durable time of up to 8 hours after full charge Lithium battery, long battery life loudspeaker works pretty well, is easy to use, and can work as an mp3 speaker strong ABS plastic material, making the quilt strong and durable.

Voice Amplifier Wearing

With the attached waistband, you can fix the voice amplifier to your waist in front or back of your body, as shown below You can adjust the length of the waistband, as shown below

Microphone Using

- Wear a microphone as in the figure below
- The two holes inside the sponge must be aimed at your mouth
- The suitable distance between the microphone and the mouth is 20~30 millimeters
- Insert the plug of the microphone into the right hole of the voice amplifier
- To achieve a maximum effect, please choose the microphone we provide cut-in, and pulling out the plug often may cause a bad connection between the microphone and the amplifier

Attention before wearing the Ear-hanging microphone: Before wearing, please don't turn on the power and volume.

Begin to Use

- Fix the voice amplifier to your body as shown before
- Wear a microphone to your head and insert the plug of the microphone into the voice amplifier
- Turn the power switch clockwise, the LED light is lightened, which means the amplifier is working
- Turn the volume button clockwise or anticlockwise can increase or decrease the volume
- Decrease the volume to avoid noises

Battery Change

Don't change the battery by yourself under warranty. The battery we provide can work a long time and avoid damage to the voice amplifier Be sure that the pole is right when you change the battery.

There is a white line on the end of the microphone, please Position it against the mouth.

Frequent Questions and Answers

- **Question: why does the voice amplifier produce so much noise?**

Answer: Adjust the microphone and decrease the volume to avoid the noises.

- **Question: how long is needed for a battery charge?**

Answer: generally about 3-4 hours is needed for battery charge, temperature and other factors may change the time.

- **Question: can you tell me the life of the battery, and can I change the battery one year later?**

The battery life is about 2-4 years, and it is changeable, please get in touch with us or our dealers.

- **Question: can you tell me why my voice amplifier can not work now?**

Answer: please check: ¢your microphone is inserted into the right hole, ¢the battery is not used out, ¢your voice amplifier is on. Please get in touch with us or our dealers if you still can solve it by yourself.
