Warranty Information

Thank you for buying the qico products! We provide comprehensive warranty services in accordance with the applicable national laws and regulations.

1. Within 12 months from date of purchase, any fault in listed device performance can be claimed under consumer warranty.
2. Warranty Registration Required: In qico computer app, the register option will be available in Settings page.
3. Valid product registration and invoice are essential for protecting your warranty rights. If you do not register the product or cannot provide valid invoice, we will provide 90-day warranty initiating from manufacturing date of your qico pad.

Warranty Instructions and Conditions

Your warranty is only valid under authorized use of your devices. All man-made damages and any of the following conditions voids the free warranty. Repair services will still be available to consumers at a reasonable cost for out of warranty devices.

1. The warranty period has expired.
2. Damage caused by human factors, including damages caused by usage under improper operating environment.
3. Damage caused by a force majeure (such as floods, fires, earthquakes, and lightning).
4. The user is unable to provide the product registration and valid proof of purchase or the product model and barcode do not match or are altered.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
