FAQ

Question/ Problem	Answer/Solution
Readings inaccurate.	1. When the environment changes drastically, for example, after being moved from outdoor to indoor, it takes about 10 minutes for the readings to approach the actual values of the new environment. 2. When the product is held in hand, the human body will affect the readings, and result in differences between the readings and the actual values of the environment. 3. Check if the vent hole at the bottom of the product is clogged. If it is, please clean it carefully, and avoid damaging the sensor.

The screen doesn't show anything.	Please refer to the instruction "Insert or Replace Battery" of this manual.
Cannot add the product in the mobile app.	If you use an Android phone, please allow the app to access "Location" in the system settings and turn on the Location service. (Scanning Bluetooth devices requires the "Location" permission on Android.) If you use Mi Home / Xiaomi Home app, please enter "Settings" from "Profile" of the app, then enter "Region", select "Chinese mainland", save and try again.

Error Code

Error Code on the Screen	Meaning/Solution
E1	The environment temperature exceeded the measurement range of the product.
E2	The sensor is malfunctioning.

Performance Faults

The content displayed on the screen is incomplete or the screen cannot display content.
No response when the button is pressed.
The button cannot be pressed down.
The sensor is not working properly.
