Precautions for Safety

Failure to follow the instructions below may cause a loss of life or serious physical injury.

1. During wiring or maintenance, please completely turn off the power of the product. (Failure to follow this may lead to an electric shock.)
2. Do not install the product in locations that subject it to excessive dust or water other than the conditions designated by the IP protection ratings indicated for each product. (Failure to follow these instructions may cause a fire to the product, electric shock, physical injury, malfunction, or damage to the product.)
3. Do not alter or repair this product. If maintenance or repair service is required, please contact your local Qlight contact point. (Failure to follow these instructions may lead to fire, electric shock, or product damage.)
4. Please apply the correct voltage to the product. (Failure to follow these instructions may lead to fire, electric shock, or product damage.)
5. When the product is applied to a condition that may impact lives or property, please make sure to have a double safety device. (Failure to follow this may cause damage to property, fire, electric shock, and loss of life.)

Precautions for Correct Use

Failure to follow the proper instructions may cause damage to property, the product, or a malfunction of the product that would void the warranty.

1. Please remove any objects that can interrupt ventilation around the product.
2. Please turn off the power of the product immediately if it fails to operate properly.
3. Carefully wire the product according to each product's specification.
4. Please be careful in preventing chemicals such as thinner, benzene, etc. in contact with the surface of the product.
5. Do not apply excessive force/impact to the product.
6. Failure to follow any of the instructions above may cause malfunction or damage to the product, fire, and electric shock.

Ordering Specifications

Wireless LED Steady/Flashing Tower light has monitoring and controlling feature via PC that consists of USB DONGLE and GATEWAY.

Application Software	USB DONGLE	GATEWAY
		

■ Description

No.	Item	Description
1	PC and mobile Application	PC Application would be a comprehensive control system by enabling the setting, ce. C# based application and software developer's API is provided. Mobile applicat
2	USB DONGLE 2 (WIZ32)	USB DONGLE (WIZ32) can connect up to 32 wireless signaling devices and is coroes not require a separate installation but simply insertion into a USB port for use.
3	GATEWAY (GW768)	GATEWAY (GW768) can connect up to 32 wireless signaling devices. Since it is poan connect up to 768 wireless signaling devices. Note: GATEWAY supports Mobile
4	ROUTER (A wireles signaling device)	A wireless signaling device replaces an existing signaling device and converts the can control the status information of production equipment more easily and quickly. mation of production equipment wirelessly and help the control tower control the wi

Components of wireless system

1. Connection through USB DONGLE

- USB DONGLE can be easily inserted into the PC and this is a method suitable for building a small-sized single wireless network (up to 32 wireless control display lamps can be connected).

2. Connection through GATEWAY

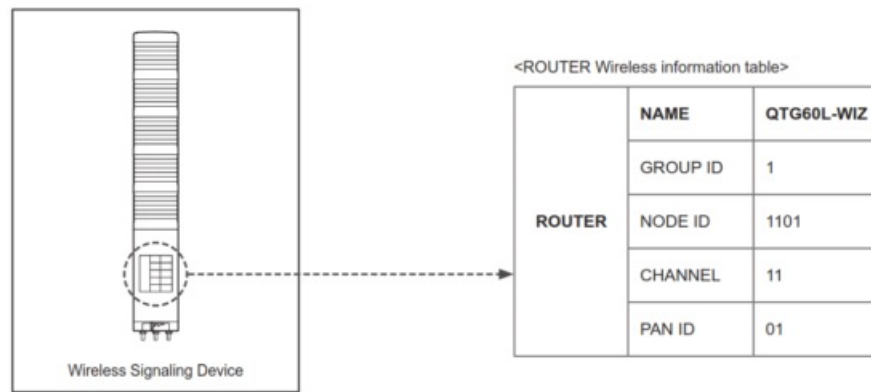

- Up to 768 wireless control indicators can be connected by adopting multiple GATEWAYS. This is suitable for large-scale business sites.
- Smartphones can monitor or control the status of signaling devices.

Information of wireless system

1. ROUTER(Wireless Signaling Device)

- The status information of the production equipment can be recognized by using an external contact and the status information is transmitted to USB DONGLE or GATEWAY. ROUTER can receive a control signal from USB DONGLE or GATEWAY.
- Please refer to the wireless information table on the label of the product.

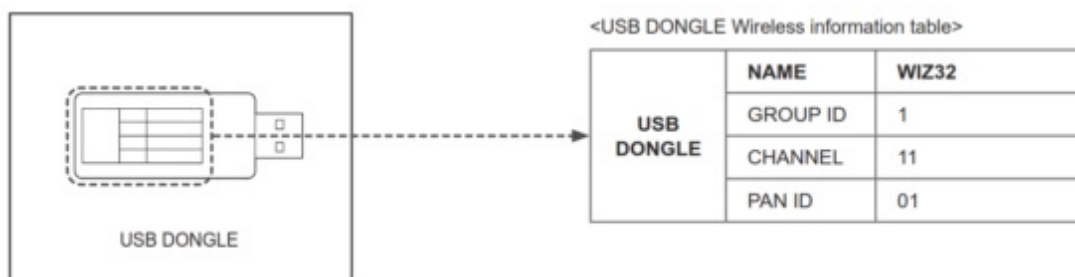

• ROUTER Wireless information table reference

ROUTER	NAME	Model name
	GROUP ID	<ul style="list-style-type: none"> • Designated GROUP ID by customer. Possible to set 1 to 24 GROUPS. • It must be set as the same as a receiver(USB DONGLE, GATEWAY).
	NODE ID	<ul style="list-style-type: none"> • Designated NODE ID(Product ID) by customer. 32 IDs are available. • Referring to 1101, 11 represents channel number. NODE ID configuration is decided)
	CHANNEL	<ul style="list-style-type: none"> • Can select up to 16 channels from 11 to 26. It must be configured the same as USB DONGLE).
	PAN ID	<ul style="list-style-type: none"> • PAN ID can be set from 0 to 65535. It is a wireless network identifier as a unit designated by the manufacturer.

2. USB DONGLE

- USB DONGLE is a wireless transmitter & receiver that is suitable for a small network with less than 32 wireless signaling devices.
- Please refer to the wireless information table on the label of the product.

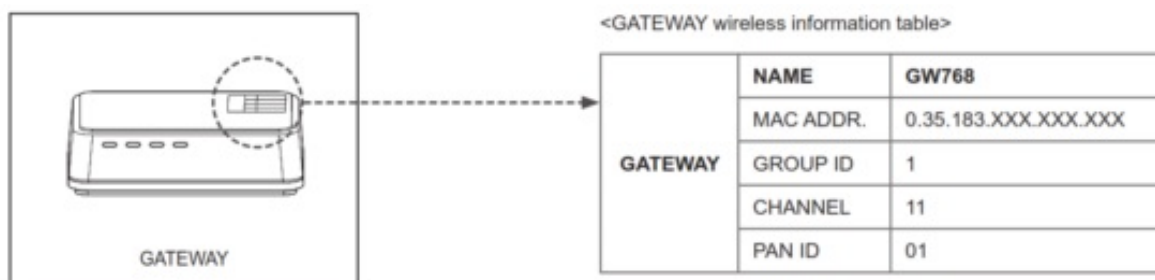

• USB DONGLE Wireless information table reference

USB DONGLE	NAME	Model name
	GROUP ID	<ul style="list-style-type: none"> • Designated GROUP ID by customer. Possible to set 1 to 24 GROUPS. • Possible to use a single unit per PC. GROUP ID must NOT be the same as ROUTER(Wireless Signaling Device). • It must be set as the same as ROUTER(Wireless Signaling Device).
	CHANNEL	<ul style="list-style-type: none"> • Can select up to 16 channels from 11 to 26. It must be configured the same as ROUTER(Wireless Signaling Device).
	PAN ID	<ul style="list-style-type: none"> • PAN ID can be set from 0 to 65535. It is a wireless network identifier as a unit designated by the manufacturer.

1. GATEWAY

- Suitable for the large-scaled network over 32 wireless networks. One GATEWAY unit is a single group, that can connect up to 24 groups.
- Support Smartphone Application
- Please refer to the wireless information table on the label of the product.

- GATEWAY Wireless information table reference

GATEWAY	NAME	Model name
	MAC ADDRESS.	<ul style="list-style-type: none">• MAC ADDRESS designated by the manufacturer.• MAC ADDRESS is used to set the IP address and network information by s
	GROUP ID	<ul style="list-style-type: none">• Designated GROUP ID by customer. Possible to set 1 to 24 GROUPS.• GROUP ID must NOT be the same as USB DONGLE.• It must be set as the same as ROUTER(Wireless Signaling Device).
	CHANNEL	<ul style="list-style-type: none">• Can select up to 16 channels from 11 to 26. It must be configured the same Device).
	PAN ID	<ul style="list-style-type: none">• Pan ID can be set from 0 to 65535. It is a wireless network identifier as a u the manufacturer.

1. Installation of PC Application

(1) SERIAL TO USB DRIVER installation

- There are two options for receiving & controlling the wireless signaling device such as USB DONGLE and USB interface with the GATEWAY. In both cases, 'USB to serial device driver' should be installed (download it from the Qlight website or <http://blog.qlight.com>).
- Select x64 or x86 EXE. file depending on your OS type.
- Silicon Labs' drivers are provided as device drivers.

x64	2020-03-10	11:25	
x86	2020-03-10	11:25	
CP210xVCPInstaller_x64	2017-09-28	2:58	1,026KB
CP210xVCPInstaller_x86	2017-09-28	2:58	903KB
dpinst	2017-09-28	2:45	12KB
SLAB_License_Agreement_VCP_Windows	2017-09-28	2:46	9KB
slabvcp	2017-10-11	2:52	11KB
slabvcp	2017-10-11	2:52	15KB
v6-7-5-driver-release-notes	2017-10-17	7:49	14KB

- After the installation completes, check if COM# Port is displayed in the Device Manager of the PC before connecting the USB DONGLE or the GATEWAY through a USB PORT.
- COM# can vary depending on the PC environment.

(2) Installation of PC Application

- The PC application is used to monitor, set, and control the status information of a wireless signaling device.
- In case of using C# Library, please refer to the Library User Manual which is provided separately.
- Please download the PC Application from our website and install it.

<= Please run .exe file. Software VERSION may be upgraded

without notice.

**For the installation instruction and usage, please refer to the manual.

(3) For the usage of API using DLL, please refer to the manual.

Parts Definition

How to Change Lens Kit

• Disassembling lens kits

- ① Twist the upper lens kit in a counter-wise direction so the "I" mark from both kits aligns.
- ② Disassemble by removing the upper lens kit from the lower one.

• Assembling lens kits

- ① Put the two lens kits together by aligning the upper lens' "I" mark and the lower lens' "I" mark together.
- ② Lock the two kits by twisting the upper lens kit in a counter-wise direction so the upper lens' "<" mark aligns with the lower lens' "I" mark.

Lens modules are connected through cone-shaped contact points. In case the contact point is damaged, it may cause a contact failure.

Installation Environment and Protection Rating

- This product is designed for indoor use with a protection rating of IP65(standard type) and IP54(buzzer type).
- If the product is installed in locations that subject it to excessive dust or water other than the designated IP protection rating indicated(IP65), it may cause malfunction or damage to the product.
- For further information, please visit our website (www.qlight.com).

Buzzer Sound Volume Adjustment Instructions

Buzzer volume is reduced by sliding the volume control lever to the left as shown in the diagram to the left. (Min. $65\pm 4\text{dB/m}$)

Raise/ Increase the buzzer volume by sliding the control lever to the right as shown in the diagram to the left. (Max. $85\pm 4\text{dB/m}$)

Mounting Hole Specifications

■ QTG60ML-WIZ / QTG70ML-WIZ – Direct Mounting Type Model

① Machine holes on the mounting surface referring to the diagram below.

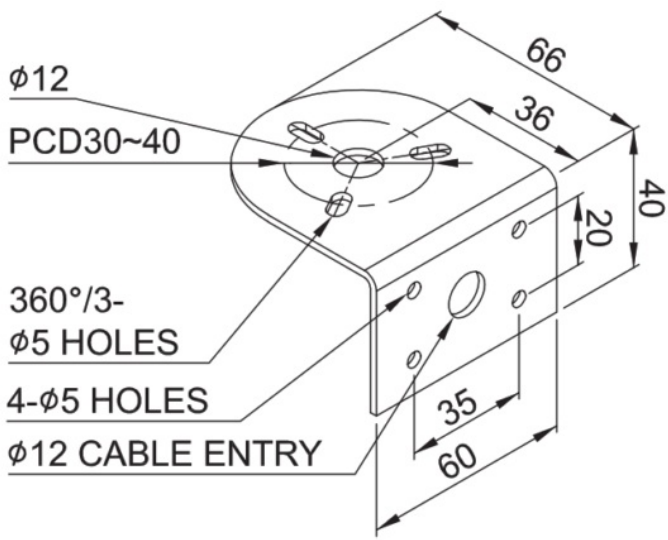

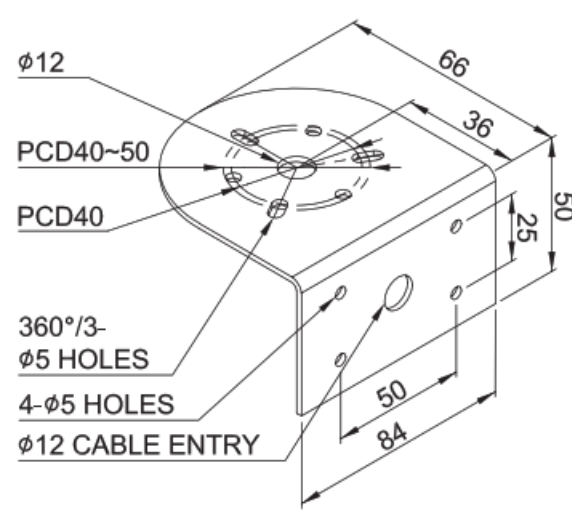

② Remove the flange nuts from bolts and place the product through the mounting surface holes.

③ Fasten the flange nuts on the opposite side of the mounting surface until the product is tightened securely.

Mounting Accessories (Sold Separately)

• Please refer to the dimensions below for the installation of mounting brackets.
