QPEUIM Stereoscopic Dial Wall Clocks

INTRODUCTION

The QPEUIM Stereoscopic Dial Wall Clock is the ideal fusion of precision, style, and usefulness. This 10-inch wall clock is a great option for bedrooms, workplaces, classrooms, and kitchens because of its 3D three-dimensional dial, bold, easy-to-read numbers, and incredibly silent quartz movement. Without the grating ticking sound of conventional clocks, the silent, non-ticking mechanism guarantees a calm atmosphere. This stylish timepiece, which is reasonably priced at **\$9.98** doubles as a useful clock and a sophisticated piece of décor. It is immediately usable because the batteries are already inserted in the packaging. The QPEUIM wall clock's contemporary and understated style blends in with any interior decor, making it a wonderful present or unique accent piece for any house or office. Additionally, you may benefit from long-term dependability and peace of mind with a three-year after-sales service guarantee.

SETUP GUIDE

- **Unpack the Clock:** Gently take the clock out of its box.
- **Examine for Damage:** Look for any cracks, flaws, or missing components.
- The battery compartment is located on the clock's rear.
- Make sure the supplied battery is properly positioned between the positive and negative terminals when you insert it.

- **Set the Time:** To set the time correctly, use the tiny dial on the rear.
- **Select an Appropriate Spot:** Decide on a wall or other surface where the clock will be clearly visible.
- **Mark the Mounting Spot:** Mark the location of the nail or hook using a pencil.
- **Install the Wall Hook or Nail:** At the designated location, fasten a strong nail or wall hook.

- Securely hang the clock by attaching the mounting hole of the clock to the hook or nail.
- **Verify Stability:** Make sure the clock is secure and level.
- Verify the visibility by standing at various angles to be sure the time is readable.
- **Avoid Direct Sunlight:** To avoid glare on the dial, keep the clock out of direct sunlight.
- Make sure it operates quietly by keeping an ear out for any odd ticking noises.

Non-Ticking Movement

*High quality movement, precise timing, quiet scanning
Provide a good sleep and work environment*

- **Monitor for Accurate Timekeeping:** After setting up, make sure the clock continues to display the correct time.
- **Adjust as Needed:** Reset the clock and check the battery again if the time changes.

CARE & MAINTENANCE

- **Dust Often:** To maintain the clock's cleanliness, use a soft cloth or microfiber duster.
- **Prevent Water Exposure:** Avoid placing the clock in moist places like restrooms.
- Periodically check the battery and replace it if the clock stops or slows down.
- **Use Alkaline Batteries:** For optimal performance, choose premium alkaline batteries.
- Avoid overtightening the mounting hook to avoid putting undue strain on the clock's hanging system.
- Strong magnetic fields should be avoided since they may interfere with the quartz movement.
- Refrain from dropping the clock; handle it carefully to avoid internal harm.
- Avoid direct sunlight to avoid color distortion or fading.
- Use in Environments with Controlled Temperatures Battery life may be impacted by extreme temperatures.
- **Avoid Disassembling:** Opening the clock could harm internal parts.
- When not in use, store in a secure location. If storing for an extended period of time, keep in its original box.
- Keep out of children's reach since small bits inside could choke them.
- Gently wipe the glass cover; for tough stains, use a moist cloth.

- **Assure a Secure Mounting:** Verify that the clock is still hanging firmly on a regular basis.

TROUBLESHOOTING

| Issue | Possible Cause | Solution |
|--------------------------------|--|--|
| Clock is not working | Battery may be drained or improperly installed | Replace or reposition the battery |
| Hands are not moving correctly | Loose or misaligned clock hands | Gently adjust the hands back into position |
| Time is inaccurate | Quartz movement may need resetting | Remove battery, wait 10 seconds, and reinsert |
| Clock is making noise | Movement may be faulty | Contact customer service for a replacement |
| Numbers are hard to read | Poor lighting or incorrect placement | Adjust the position for better visibility |
| Second hand is skipping | Low battery power | Replace with a new battery |
| Clock does not mount securely | Hook or nail may be misaligned | Use a proper wall hook or reposition it |
| Battery drains too quickly | Defective quartz movement | Contact manufacturer for warranty replacement |
| Minute hand is dragging | Obstruction inside the clock | Open the back and ensure nothing is blocking the hands |
| Clock falls off the wall | Improper mounting method | Ensure it's securely placed on a sturdy hook |
