R-Go

R-Go Tools Compact Break Keyboard

Specifications

- Product Name: R-Go Compact Break
- Product Type: Ergonomic Keyboard
- Layouts: All layouts
- Compatibility: Windows XP/Vista/10/11

Product Overview

The R-Go Compact Break is an ergonomic keyboard available in wired and wireless versions. It features various indicators, function keys, and compatibility with the R-Go Break software.

Setup Wired

To set up the wired version of the keyboard:

1. Connect the keyboard to your computer by plugging the USB-C end of the cable into port 02 and the USB-C end into your computer.
2. (Optional) Connect a Numpad or another device to the keyboard by plugging them into port 01 or 03.

Setup Wireless

To set up the wireless version of the keyboard:

1. Turn on the keyboard using the on/off switch located at the back of the keyboard.
2. Choose channel 1, 2, or 3 by pressing the corresponding key. Press and hold the key of your chosen channel until the light indicator on the upper right side turns on.
3. Open "Settings" on your device and set up the connection.
4. To charge the keyboard, connect it to your computer using the provided cable.

Function Keys

The function keys on the keyboard are marked in blue. To activate a function key, press the Fn key at the same time as the selected function key. For example, Fn + A turns the Break indicator light On/Off.

R-Go Break

The R-Go Break software can be downloaded from the provided link. It is compatible with R-Go Break keyboards and mice. The software helps you remember to take breaks from work and provides feedback on your break behavior through LED light indicators on the keyboard or mouse.

Troubleshooting

If you encounter any issues with the product, please contact us via info@r-go-tools.com.

Congratulations with your purchase!

Our ergonomic R-Go Compact Break keyboard offers all the ergonomic features you need to type in a healthy way. Thanks to the light keystroke, minimal muscle tension is needed while typing. Its thin design ensures a relaxed, flat position of hands and wrists while typing. When using both keyboard and mouse at the same time, your hands always stay within shoulder width. This natural posture reduces muscle tension in your shoulder and arm and prevents RSI complaints. The R-Go Compact Break keyboard also has an integrated break indicator, which indicates with colour signals when it is time to take a break. Green means you are working healthy, orange means it is time to take a break and red means you have been working too long. #stayfit

System requirements/Compatibility: Windows XP/Vista/10/11

Function keys

The function keys are marked on the keyboard in blue.

To activate a function key on your keyboard, press the Fn-key at the same time as the selected function key.

Note: Fn + A = Break indicator light On/Off

R-Go Break

- Download the R-Go Break software at <https://r-go.tools/bs>
- The R-Go Break software is compatible with R-Go Break keyboards and mice. It gives you insight into your work behaviour and gives you the possibility to customize your keyboard buttons.
- The R-Go Break is a software tool that helps you to remember to take breaks from your work. As you work, the R-Go Break software controls the LED light on your Break mouse or keyboard. This break indicator changes color, like a traffic light. When the light turns green, it means you are working healthily. Orange indicates that it is time for a short break and red indicates that you have been working too long. This way you receive feedback on your break behavior in a positive way.

Troubleshooting

Is your keyboard not working properly, or do you experience problems while using it? Please follow the steps mentioned below.

- Check if the keyboard is connected using the correct connector and cable (page 4-7)
- Connect the keyboard to another USB port of your computer
- Connect the keyboard directly to your computer if you are using an USB hub
- Restart your computer
- Test the keyboard on another computer, if it is still not working contact us via info@r-go-tools.com.
