R-Go Tools Ergonomic Keyboard

## Product Information

### Specifications

- Product Name: R-Go Compact Break
- Product Type: Ergonomic Keyboard
- Layouts: All
- Connection Type: Wired | Wireless
- Compatibility: Windows XP/ Vista/10/11

### Product Overview

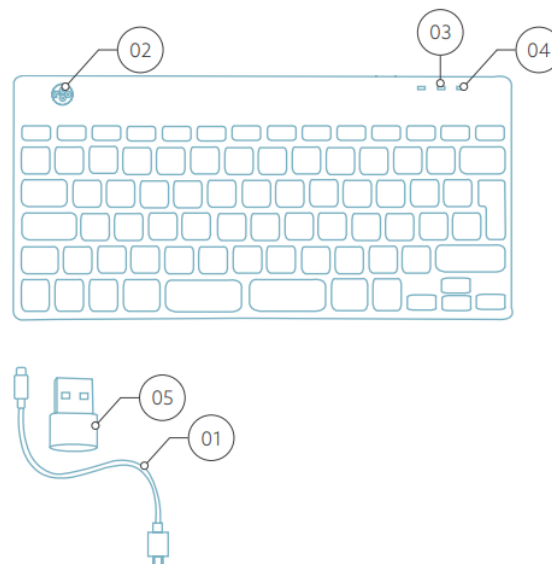

The R-Go Compact Break is an ergonomic keyboard available in both wired and wireless versions. It features a compact design and offers a comfortable typing experience. The keyboard has various indicators and function keys to enhance usability.

#### Setup Wired

To set up the wired version of the R-Go Compact Break keyboard, follow these steps:

#### Overview USB-ports

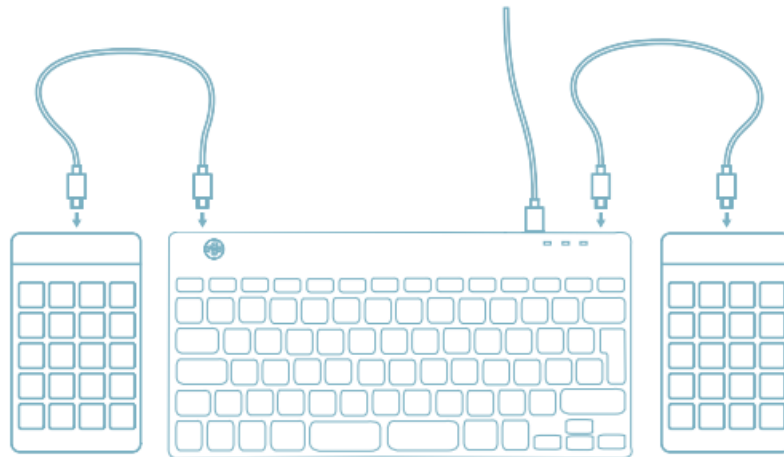

- Hub – other devices (not to computer)
- Connect to computer

1. Connect the keyboard to your computer by plugging the USB-A end of the cable into port 05 on the keyboard and the USB-C end into your computer.

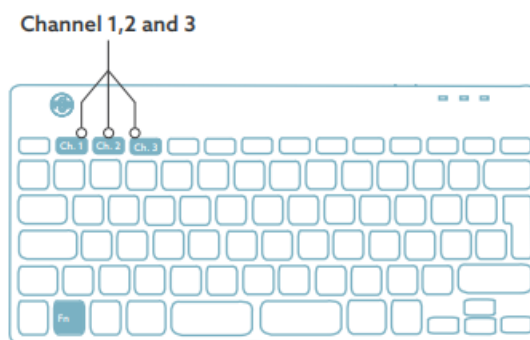

2. (Optional) Connect a Numpad or another device to the keyboard by plugging them into port 01 or 03 on the keyboard.

## Setup Wireless

To set up the wireless version of the R-Go Compact Break keyboard, follow these steps:

1. Turn on the keyboard using the on/off switch located at the back of the keyboard.

2. Choose a channel (1, 2, or 3) to connect the keyboard. Press and hold the Fn-key, and then press the key corresponding to your chosen channel. The keyboard will search for a device to connect with.
3. Open the “Settings” on your device and set up the connection.
4. To charge the keyboard, connect it to your computer using cable 01.

## Function Keys

The R-Go Compact Break keyboard has function keys marked in blue. To activate a function key, press the Fn key simultaneously with the selected function key. For example, Fn + A turns the Break indicator light on/off.

## R-Go Break Software

The R-Go Break software is a tool that helps you remember to take breaks from your work. It is compatible with R-Go Break keyboards and mice. The software controls the LED light on your Break mouse or keyboard, changing colors to indicate your work behavior. Green means you are working healthily, orange indicates a short break is needed, and red indicates you have been working too long. The software also allows the customization of keyboard buttons.

## Troubleshooting

If you encounter any issues with the R-Go Compact Break keyboard, please contact us via [info@r-go-tools.com](mailto:info@r-go-tools.com).

## Product Info

Congratulations on your purchase. Our ergonomic R-Go Compact Break keyboard offers all the ergonomic features you need to type in a healthy way. Thanks to the light keystroke, minimal muscle tension is needed while typing. Its thin design ensures a relaxed, flat position of hands and wrists while typing. When using both keyboard and mouse at the same time, your hands always stay within shoulder width. This natural posture reduces muscle tension in your shoulder and arm and prevents RSI complaints. The R-Go Compact Break keyboard also has an integrated break indicator, which indicates with color signals when it is time to take a break. Green means you are working healthily, orange means it is time to take a break, and red means you have been working too long. #stayfit  
System requirements/Compatibility: Windows XP/ Vista/10/11

## R-Go Break

Download the R-Go Break software at <https://r-go.tools/bs>

The R-Go Break software is compatible with R-Go Break keyboards and mice. It gives you insight into your work behavior and gives you the possibility to customize your keyboard buttons.

The R-Go Break is a software tool that helps you to remember to take breaks from your work. As you work, the R-Go Break software controls the LED light on your Break mouse or keyboard. This break indicator changes color, like a traffic light. When the light turns green, it means you are working healthily. Orange indicates that it is time for a short break and red indicates that you have been working too long. This way you receive feedback on your break behavior in a positive way.
