R-Go Tools RGOCOCHWLWH Compact Break R Go keyboard

Specifications

- Product: R-Go Compact Break
- Type: Ergonomic Keyboard
- Compatibility: Windows XP/Vista/10/11
- Connection: Wired | Wireless

Product Overview

The R-Go Compact Break is an ergonomic keyboard available in wired and wireless versions. The keyboard features various indicators and function keys for enhanced usability.

Setup Wired

1. Connect the keyboard to your computer by plugging the USB-C end of cable into the designated port on your computer.
2. (Optional) Connect additional devices like a Numpad to the keyboard using the provided ports.

Setup Wireless

1. Turn on the keyboard using the switch located at the back.
2. Choose a channel (1, 2, or 3) for connection by pressing the Fn key and the corresponding channel key.
3. Open device settings to establish the wireless connection.
4. To charge the keyboard, connect it to your computer using the provided cable.

Function Keys

The function keys are marked in blue on the keyboard. Press the Fn key simultaneously with the desired function key to activate it. For example, Fn + A turns the Break indicator light on/off.

R-Go Break Software

The R-Go Break software is a tool to remind you to take breaks during work. It controls LED lights on compatible

R-Go Break keyboards and mice, changing colors to indicate break times. Download the software for customization options and work behavior insights.

Troubleshooting

If you encounter any issues with the product, please contact us via email at info@r-go-tools.com for assistance.

FAQ:

Q: Is the R-Go Compact Break compatible with Mac operating systems?

A: The R-Go Compact Break is designed for Windows operating systems and may not be fully compatible with Mac OS.

Congratulations with your purchase!

Our ergonomic R-Go Compact Break keyboard offers all the ergonomic features you need to type in a healthy way. Thanks to the light keystroke, minimal muscle tension is needed while typing. Its thin design ensures a relaxed, flat position of hands and wrists while typing. When using both keyboard and mouse at the same time, your hands always stay within shoulder width. This natural posture reduces muscle tension in your shoulder and arm and prevents RSI complaints. The R-Go Compact Break keyboard also has an integrated break indicator, which indicates with colour signals when it is time to take a break. Green means you are working healthy, orange means it is time to take a break and red means you have been working too long. #stayfit System

requirements/Compatibility: Windows XP/Vista/10/11

Product Overview

1. Wired version: Cable to connect keyboard to PC

Wireless version: Charging cable

2. R-Go Break indicator

3. Caps Lock indicator

4. Scroll Lock indicator

5. USB-C to USB-A converter

Setup Wired

Overview USB-ports

1. Hub – other devices (not to computer)
2. Connect to computer

•

Connect the keyboard to your computer by plugging the USB-C end of cable **01** into port **02** and USB-C end into your computer.

- (Optional) Connect Numpad or another device to the keyboard by plugging them into port **01** or **03** .

Setup Wireless

- Turn the keyboard on. At the back of the keyboard you will find the on/off switch.

Channel 1,2 and 3

- To connect the keyboard you can choose channel **1, 2 or 3**. If you press once the chosen channel, you can change devices. Press and hold the Fn-key and press the key of your chosen channel. It will search for a device to connect with. Hold until the light indicator on the upper right side turns on.
- Open "Settings" on the device. Set up the connection.
- To charge the keyboard, connect the keyboard to your computer using cable **01**.

1. **There is no dongle with my wireless keyboard. Is that correct?**

Yes, that is correct. Our wireless products work via Bluetooth. You only need to pair your keyboard and your computer once.

2. **How do I pair my wireless Bluetooth keyboard with my computer?**

- From the Windows menu, go to 'Settings' and click on 'Devices'.
- Switch Bluetooth to 'on'.
- Ensure that your new device is sufficiently charged.
- Press and hold the sync button on the bottom of the device until the blue light blinks.
- Select the device from the displayed row on the computer screen to connect it to the computer.

Function keys

The function keys are marked on the keyboard in blue.

To activate a function key on your keyboard, press the Fn-key at the same time as the selected function key.

Note: Fn + A = Break indicator light On/Off

R-Go Break

Download the R-Go Break software at <https://r-go.tools/bs>

The R-Go Break software is compatible with R-Go Break keyboards and mice. It gives you insight into your work behaviour and gives you the possibility to customize your keyboard buttons.

The R-Go Break is a software tool that helps you to remember to take breaks from your work. As you work, the R-Go Break software controls the LED light on your Break mouse or keyboard. This break indicator changes color, like a traffic light. When the light turns green, it means you are working healthily. Orange indicates that it is time for a short break and red indicates that you have been working too long. This way you receive feedback on your break behavior in a positive way.
