R-Go RGOCOUKWLWH Compact Break Keyboard
Congratulations with your purchase!

Our ergonomic R-Go Compact Break keyboard offers all the ergonomic features you need to type in a healthy way. Thanks to the light keystroke, minimal muscle tension is needed while typing. Its thin design ensures a relaxed, flat position of hands and wrists while typing. When using both keyboard and mouse at the same time, your hands always stay within shoulder width. This natural posture reduces muscle tension in your shoulder and arm and prevents RSI complaints. The R-Go Compact Break keyboard also has an integrated break indicator, which indicates with colour signals when it is time to take a break. Green means you are working healthy, orange means it is time to take a break and red means you have been working too long. #stayfit System requirements/Compatibility: Windows XP/Vista/10/11

Function keys

The function keys are marked on the keyboard in blue. To activate a function key on your keyboard, press the Fn-key at the same time as the selected function key.

Note: Fn + A = Break indicator light On/Off

R-Go Break

Download the R-Go Break software at **https://r-go.tools/bs**
The R-Go Break software is compatible with R-Go Break keyboards and mice. It gives you insight into your work behaviour and gives you the possibility to customize your keyboard buttons. The R-Go Break is a software tool that helps you to remember to take breaks from your work. As you work, the R-Go Break software controls the LED light on your Break mouse or keyboard. This break indicator changes color, like a traffic light. When the light turns green, it means you are working healthily. Orange indicates that it is time for a short break and red indicates that you have been working too long. This way you receive feedback on your break behavior in a positive way.
