r-go Split Break Keyboard

Specifications

- **Product Name:** R-Go Split Break (v.2)
- **Type:** Ergonomic Keyboard
- **Layouts:** All layouts available
- **Connectivity:** Wired | Wireless

Product Overview

The R-Go Split Break (v.2) is an ergonomic keyboard designed to enhance comfort and reduce strain during extended typing sessions.

Setup Wired

1. Connect the keyboard to your computer using the provided USB-C cable. Use the USB-C to USB-A converter if your computer only has a USB-A port.
2. (Optional) Connect a Numpad or another device to the keyboard via the USB-C hub.

Setup Wireless

1. Turn on the Break keyboard using the switch located at the back. Ensure the switch is set to 'on' or green depending on the version.
2. Check if Bluetooth is turned on. If not, enable Bluetooth on your device.
3. Access Bluetooth settings on your device, search for nearby devices and select the Break keyboard to establish a connection.

Function Keys

- The function keys on the keyboard are marked in blue. To activate a function, press the Fn key simultaneously

with the desired function key. For example, Fn + A controls the Break indicator light.

R-Go Break

- For additional information about the R-Go Break software, scan the provided QR code or visit the specified link.

Troubleshooting

- If you encounter any issues with the product, please contact us via email at info@r-go-tools.com for assistance.

FAQ

Q: How can I switch between wired and wireless modes on the R-Go Split Break keyboard?

A: To switch between wired and wireless modes, follow these steps:

1. **Wired Mode:** Connect the keyboard to your computer using the USB-C cable.
2. **Wireless Mode:**
 - Turn on the keyboard using the switch at the back.
 - Ensure Bluetooth is enabled on your device.
 - Access Bluetooth settings, search for nearby devices, and connect to the Break keyboard.

Congratulations on your purchase!

- Our ergonomic R-Go Split Break keyboard offers all the ergonomic features you need to type in a healthy way. The two keyboard parts can be placed in any desired position and give you maximum freedom.
- This unique design ensures a natural and relaxed position of the shoulders, elbows, and wrists. Thanks to the light keystroke, minimal muscle tension is needed while typing. Its thin design ensures a relaxed, flat position of hands and wrists while typing.
- The R-Go Split Break keyboard also has an integrated brake indicator, which indicates with color signals when it is time to take a break.
- Green means you are working healthy, orange means it is time to take a break, and red means you have been working too long #stayfit System Requirements/Compatibility: Windows XP/Vista/10/11

Setup Wired

- **A** Connect the keyboard to your computer by plugging cable **1A** into your computer. (Use the converter **02** if your computer has only a USB-A connection.)

- **B** (Optional) Connect Numpad or another device to the keyboard by plugging it into your USB hub **07**.

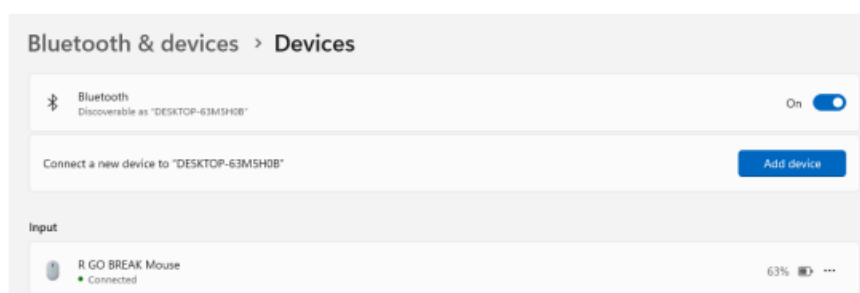

1. Turn your Break keyboard on. At the back of the keyboard, you will find the on/off switch. Turn the switch to 'on' or, depending on the version, to green.

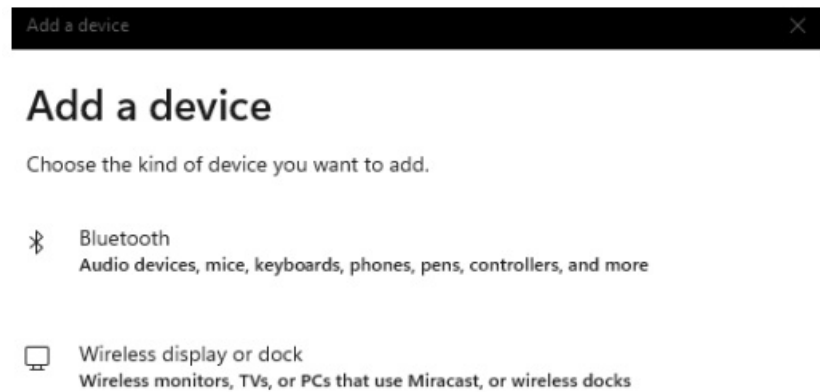

2. It is possible to connect this keyboard to 3 different devices, such as your PC, laptop, or mobile phone. To connect it, you can choose channel 1,2 or 3. Each channel can be connected to one device.
 - To connect the keyboard to one device, for example, your laptop, press and hold the Fn- key together with the key of your chosen channel for at least 3 seconds.
 - It will search for a device to connect with. You will see the Bluetooth light on the keyboard blinking.
3. Go to the Bluetooth & other devices menu on your computer. To find this you can type "Bluetooth" in the left corner of your Windows bar.

4. Check if bluetooth is on. If not, turn on bluetooth or check if your PC has Bluetooth.

- Click on "Add device" and then "Bluetooth". Select your Break keyboard. The keyboard will then connect to your chosen device.

- **I can't find my Break keyboard. What to do?**

- If you can't find your Break keyboard, please check if the battery is full (connect the charging cable with USB-C). When the battery is low the LED light on the keyboard will turn red to indicate that the keyboard is charging.
- When charged for a minimum of 5 minutes, you can try to connect again.

- **How do I know if my device has Bluetooth?**

- To check if your PC has Bluetooth, type at the bottom in the Windows bar "device manager".

- You will see the following screen (see picture). When your PC hasn't got bluetooth, you won't find 'bluetooth' in the list. You won't be able to use Bluetooth devices.

- To connect 3 different devices to 3 channels please repeat the steps above for each device.
- Do you want to switch between devices? Press shortly the Fn- key together with your chosen channel (1,2 or 3). Now you can quickly switch between for example your PC, laptop, and mobile phone.
- To charge this keyboard, connect it to your computer using cable **01**.

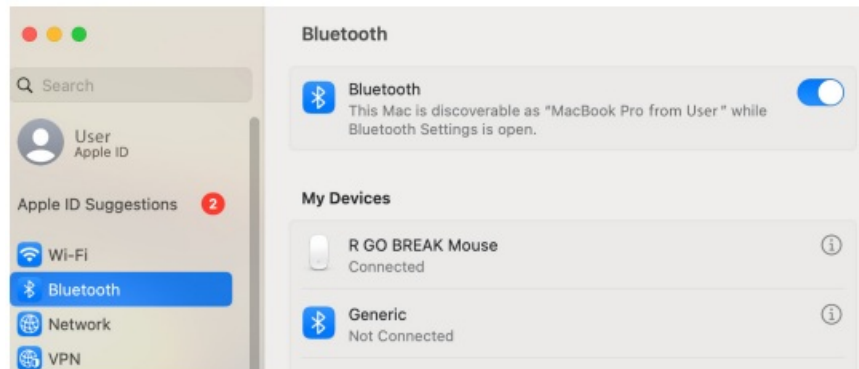

Mac

- Turn your Break keyboard on. At the back of the keyboard, you will find the on/off switch. Turn the switch to 'on' or, depending on the version, to green.
- It is possible to connect this keyboard to 3 different devices, such as your PC, laptop, or mobile phone. To connect it, you can choose channel 1,2 or 3. Each channel can be connected to one device. To connect the keyboard to one device, for example, your laptop, press and hold the Fn- key together with the key of your chosen channel for at least 3 seconds. It will search for a device to connect with. You will see the Bluetooth light on the keyboard blinking.
- Go to Bluetooth on your screen. To find this you click on the Mac icon in the upper left and go to System

settings.

4. Check if Bluetooth is on. If not, turn on Bluetooth or check if your PC has Bluetooth.

5. Scroll down to 'Nearby Devices' and click Connect.

Function keys

- The function keys are marked on the keyboard in blue.
- To activate a function on your keyboard, press the Fn key at the same time as the selected function key.
- **Note:** Fn + A = Break indicator light On/Off.

R-Go Break

- Download the R-Go Break software at <https://r-go.tools/bs>
- The R-Go Break software is compatible with all R-Go Break keyboards. It gives you insight into your work behavior and gives you the possibility to customize your keyboard buttons.
- The R-Go Break is a software tool that helps you to remember to take breaks from your work. As you work, the R-Go Break software controls the LED light on your Break mouse or keyboard. This break indicator changes color, like a traffic light.
- When the light turns green, it means you are working healthily. Orange indicates that it is time for a short break and red indicates that you have been working too long. This way you receive feedback on your break behavior positively.
- For more information about the R-Go Break software, scan the QR code! https://r-go.tools/break_web_en

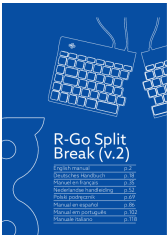

Troubleshooting

Is your keyboard not working properly, or do you experience problems while using it? Please follow the steps mentioned below.

- Connect the keyboard to another USB port of your computer.
- Connect the keyboard directly to your computer if you are using a USB hub.
- Restart your computer.
- Test the keyboard on another device, if it is still not working contact us via info@r-go-tools.com.
