Install driver

To customize the gaming keyboard for each operation, please download the software from www.rapoo.com.

Key assignment

All keys can be customized with different functions, to get better and more convenient control. Program single and combined key commands, macro definitions, basic functions, advanced functions, etc.

Brightness adjustment

Brightness +/-

A total of 5brightness level adjustment. Brightness levels were 0%, 25%, 50%, 75%, 100%.(default 75%) full keypad, no separate control.

Macro Manager

Macro manager allows you to program and manage your macros. In this window, you can create and modify macros, assign a command or a series of commands to keys, etc.

Troubleshooting

I always press the Windows key while gaming.

There is a windows lock key in the upper right area. It allows you to lock the key and disable it to prevent accidental activations.

Why can not I use the customized functions?

This keyboard allows you to customize keys. Customized key functions are only available in the game mode. If you want to use the customized functions, please make sure you have switched on the game mode and the switch light is on.

Warranty

The device is provided with two-year limited hardware warranty from the purchase day. Please see www.rapoo.com for more information.

EN 62479:2010
EN 60950-1:2006+A11:2009+A1:2010+A12:2011+A2:2013

The product is in compliance with the essential requirements of Radio
Equipment Directive 2014/53/EU, and the RoHS Directive 2011/65/E

Manufacturer/Authorised representative
Kai Guo, Manager
R&D Department Date of Issue: Aug. 30, 2019

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.

Made in China

ISED RSS warning

This device complies with Industry Canada licence-exempt RSS standard (s). Operation is subject to the following two conditions:

1. this device may not cause interference, and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

ISED Radiation Exposure Statement:

This equipment complies with ISED RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

It is forbidden to reproduce any part of this quick start guide without the permission of Shenzhen Rapoo Technology Co., Ltd.
