Use Chroma Studio in Synapse 3

The Chroma Studio section enables you to create and edit your own Chroma Effects which you can apply to all supported Razer Chroma-enabled devices.

1. Open Razer Synapse 3 and navigate to "STUDIO" from the top tab.

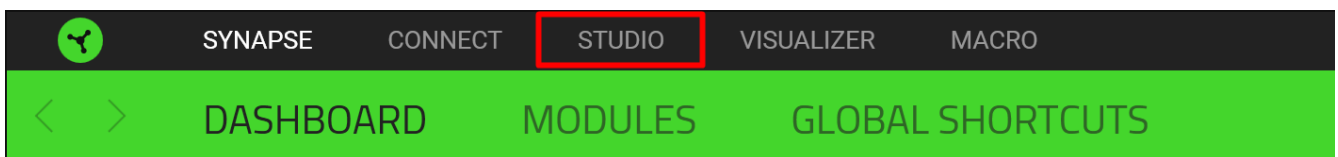

2. There are several options to use in Chroma studio:

   1. Effect layer – The added effects can be seen in this section.

   2. Add Effect – Under this section, you select your desired effect.

   3. Add Group – This option creates a group for your effect layers.

   4. Duplicate effect – This option duplicates the selected effect.

   5. Delete effect – This option deletes the selected effect.

   6. Quick Selection – It is a dropdown menu with presets to easily customize your Razer devices.

   7. Chroma Profile – This shows the Chroma Profile you are working or editing on.

   8. Tools – This shows tools for selection and editing.

   9. Undo / Redo – Undos and redos your recent actions.

   10. Effect settings – This column shows numerous settings for the lighting effects such as color, speed, and

more.

11. Save – Click it to save your settings.

For more information, refer to **Chroma Studio's Online Master Guide**.
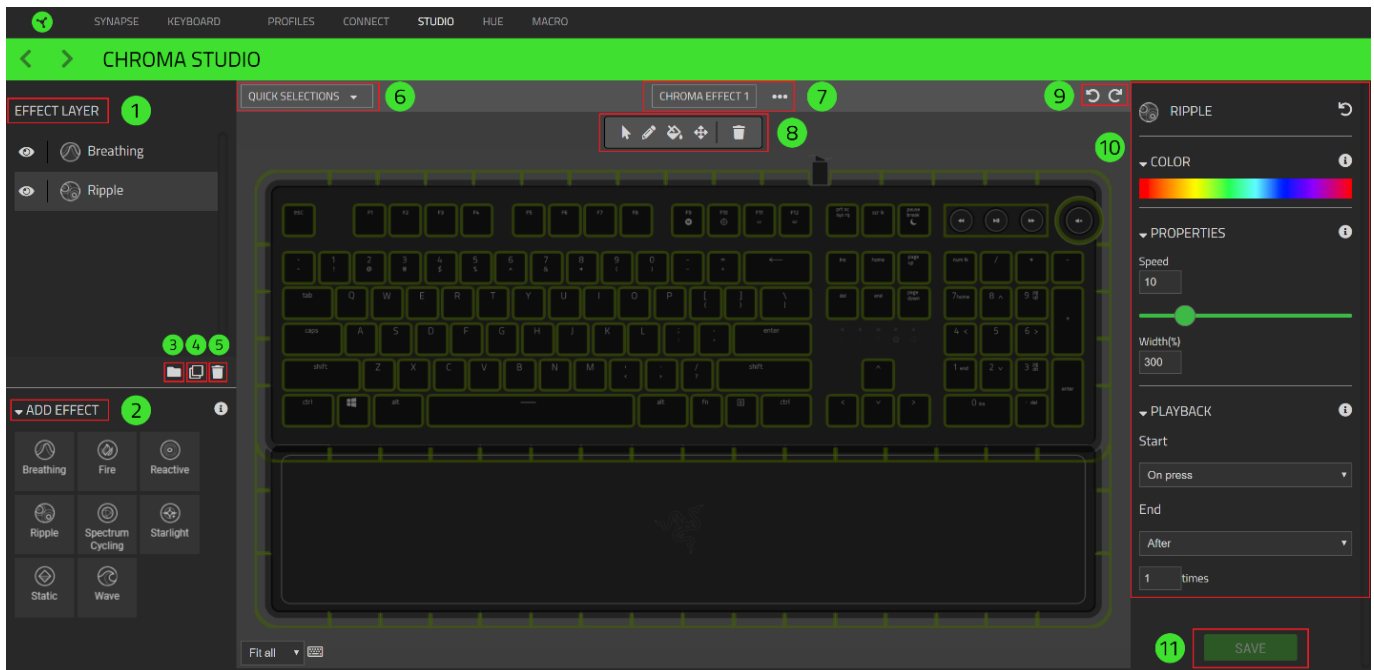

To learn how to add or remove an effect, refer to **How to add lighting effects on Razer Synapse 3 Chroma Studio** and **How to remove Chroma effects on Razer Synapse 3**, respectively.
