Common Questions

How can I modify or disassemble my Razer product?

Any attempt to modify or disassemble your Razer product will void the manufacturer's warranty.

How do I request replacement parts for my Razer product?

You can check the complete list of our current spare parts and accessories online, but if the item you need is not listed, do not hesitate to contact our Customer Support team.

What is on-the-fly macro recording on Razer Mice and Keyboards?

On-the-fly macro recording allows users to record lengthy macros in the game, without having to access driver menus or other software. For example, you can hit the "Macro Record" key and input a sequence of multiple spells in "World of Warcraft" to a specified key. The same sequence of spells can then be executed automatically with the actuation of that one button.

Troubleshooting

When the mouse is paired to my laptop via Bluetooth, the connection intermittently cuts in and out. How do I fix this?

Try updating your Intel drivers by visiting: <https://www.intel.com/content/www/us/en/support/intel-driver-support-assistant.html>

How do I use the "Surface Calibration" tool to adjust the mouse to my specific mouse pad and gaming style?

The Auto-Calibration feature is available on specific models of Razer mice. The auto-calibration feature on the

mouse is set to “ON” by default. When plugging your mouse into your system, your mouse should be sitting on the surface you want to use your mouse on for it to calibrate properly to that surface. The distance to which you want the mouse to cut off tracking is adjustable through the software package that comes with the mouse.

Note: Check first if your Razer mouse has the Surface Calibration feature before trying anything.

How to use the On-The-Fly sensitivity function on my Razer mouse?

If a button has been assigned with “On-the-fly sensitivity”, press and hold it while scrolling up or down, this will pop-up a bar on the bottom right-hand corner of your screen allowing you to adjust the sensitivity settings.

Why is my Razer Atheris unable to reconnect back to my Mac?
