## RCN DTA-ES DTA Remote Control

### For Programming Dy TV Manufacturer

1. Locate the manufacturer's code for
2. Turn on your TV
3. Depress the SET key for three seconds until the LED illuminates. Release the key;
4. Enter the manufacturer's code from the list
5. Verify the TV can be controlled by depressing the TV power key the TV turns off, um
6. If the TV cannot be a controlled property, return to Step 1 and enter the needed code from the list. You may have to perform this operation numerous times until correct operation of the TV is achieved.
7. If the above steps do not identify a code to operate the TV, perform the Code Search Programming Method.

### Code Search Programming Method:

1. Turn on your TV
2. Depress the 'SET' key for three seconds until the LED illuminates. Release the key
3. Repeatedly press the CH+ or CH- until the TV turns off.
4. Verify that the Volume and Mute functions operate on the TV.
5. If they do not operate, perform Steps 1-5 until proper operation is achieved.

### TV Code identification:

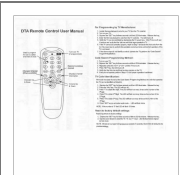

If the code has been found by the Code Search Programming Method, the code that operates the TV can be identified as follows:

1. Depress the SET key for three seconds until the LED illuminates. Release the key
2. Press the Info key. The LED will turn on
3. Press "1" to obtain the first digit; The LED will flash as many times as the number of the 1st digit
4. Press 2 to obtain a 2nd digit. The LED will flash as many times as the number of the 2nd digit
