REDBACK 2080C 10 Zone 100V Line PA Speaker Selection Panel

Overview

Enables the control of paging and background music over 10 speaker zones. An incoming signal is able to be switched to the zones required. An ALL CALL button is provided. The design allows multiple units to be connected together to create an infinite number of zones. Connection is via screw terminals on the rear panel of the unit. Designed for distributed PA systems such as schools, clubs, office buildings and recreation centres. The unit is fully self contained and requires no external power source. Suitable for 100V or 70V systems.
