### **Requirements, Safety, Warranty & Regulatory Guide for RemWave Sleep**

#### **REQUIREMENTS**

The RemWave Sleep sensor requires a 2.4 GHz Wi-Fi network, a working broadband internet connection with at least 2 Mbps upload speed (DSL may not qualify), a compatible mobile device, the free RemWave Sleep app, and a RemWave account. Minimum requirements are available at [biofi.com/](https://biofi.com/) requirements. Live biometric data, phone alerts, and history may be subject to interruptions or failures for reasons beyond Praesidium's control, like

intermittent Wi-Fi or service provider outages. Subscription(s) may be required for some features, and terms, conditions, and/or charges may apply. All features, functionality, and other product specifications are subject to change without notice or obligation.

## SAFETY

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device should be operated with a minimum separation distance of 20 cm (8 inches) between the equipment and a person's body and minimum separation distance of 7 cm (3 inches) between the sensor and any object.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.
