Set up the Camera on the App

There are two methods to do the initial setup of the camera:

1. with a Wi-Fi connection; 2. with a network cable connection.
1. With Wi-Fi Connection

Step 1. Tap the  icon in the top right corner to add the camera

Step 2. Scan the QR code on the camera

Step 3. Tap Choose Wi-Fi Connection to configure the Wi-Fi settings.

Step 4. After you hear the voice prompts from the camera, tick “I have heard the voice played by the camera” and tap Next

Step 5. Select a WiFi network, enter the WiFi password, and tap Next

Step 6. Scan the QR code on the app with the camera lens.

Tap Scan Now. The QR code will be generated and displayed on your phone.

Please hold your phone in front of the camera at a distance of about 20 cm (8 inches) and have the phone face the camera lens to let the camera scan the QR code

After you hear the beep sound, tick "I have heard a beep sound from the camera" and tap Next

Step 7. After you hear a voice prompt “Connection to the router succeeded” from the camera, tick “I have heard the voice prompt” and tap Next

Note: If you hear the voice prompt “Connection to the router failed”, please double-check if you have entered the Wi-Fi information correctly in the previous step.

Step 8. Create a login password and name your camera

Step 9. Initialization finished. Tap Finish, and you can start live viewing now

2. With a Network Cable Connection

To do the initial setup, please power on the camera with the DC adapter, connect the camera to your router's LAN port with an Ethernet cable, and follow the steps below.

Step 1. If your phone, the camera, and the router are on the same network and you've enabled the Add Device Automatically option in the App Settings, you can tap and select this device on the Devices page and skip to Step 3

Otherwise, you can tap the  icon in the top right corner and scan the QR code on the camera to add the camera.

Step 2. Tap Choose Network Cable Connection.

Please make sure the camera is connected in the correct way, as shown in the diagram, and then tap Access the Camera

Step 3. Create a device password and name the device .

Step 4. Select the WiFi network that you want to join, enter the password of the WiFi network, and tap Save to save the configuration.

Step 5. Initialization finished. Tap Finish, and you can start live viewing now.

Install the Camera

Following the excitement of setting up your TrackMix, you will face up the installation of the camera. So we are here to help you with guides on how to mount the TrackMix camera on the wall or the ceiling. It's up to you.

Mount the Camera on the Wall

Step 1. Stick the mounting hole template on the wall and drill holes correspondingly.

Step 2. Screw the mount base to the wall using the screws included in the package.

Step 3. You may control the camera to pan and tilt via Reolink App or Client to adjust the camera's direction

Note: If you install the camera on a pretty hard surface such as drywall, use the drywall anchors included in the package.

Mount the Camera on the Ceiling

Step 1. Stick the mounting hole template on the ceiling and drill holes correspondingly.

Step 2. Install the mount base to the wall using the screws included in the package.

Step 3. Adjust the camera's direction by controlling the camera to pan and tilt via the Reolink App or Client.

Note: Use the drywall anchors included in the package if needed .
