  - ■ Hold **(-)+C** to enable

Alternate Mode:

- Not all fighting game mappings are the same! We have added an alternate mode to cover most use cases. If you know one not mentioned feel free to reach out 1o our team for added support
- There are two modes normal and a secondary mode that is able to change button assignments. In normal mode you cannot change button assignment S0 there is always a standard profle to roll back to (see **BUTTON MAPPING GUIDE**)
  - ■ Hold **(+)+(-)** to enable
    - ○ Within the alternate mode hold **L + (+)**

Switch Alternate Mode:

- Switch controllers use a seperate macro to swap the button asignments.

(sec **BUTTON MAPPING GUIDE**)

■ Hold **(+) +(-)** to enable

Switch Trigger to Shoulder Mode:

- We have added this macro to simply swap the shoulder and trigger button input positions
  - ■ Hold **(-)+Z**

Input Mode Swap:

- Some games and devices prefer one protocal over another. This macro allows free swapping between X and D-Input modes for best compatibility
  - ■ Hold **HOME** (triangle button) to enable
