REVALL

REVALL GC-18 Bluetooth FM Transmitter

Product Information

Plug & Play

1. Install the device into the cigarette lighter socket (12V-24V).
2. Select a frequency on your radio (87.5-108 MHz).
3. We advise to use an empty frequency for the best sound quality. 87.5, 87.6, 107.9 or 108 MHz
4. Long press the menu button and match the frequency with the frequency of the radio. By pressing the left (<) and right (>) buttons you can change the frequency.
5. Connect your mobile device with the Bluetooth (GC-18).
6. To increase the volume; long press the right button (>).
7. To decrease the volume; long press the left button (<).
8. Listen to your favourite playlists and call safely with your friends and family!

FAQ

Why is my device not connecting?

- Check if the radio frequency matches the frequency of the FM Transmitter.
- Verify if your mobile device is connected to the Bluetooth of the FM transmitter GC-18.
- We advise to use 87.5, 87.6, 107.9 or 108 MHz for the best sound quality.

Why do I hear static?

- Check if the radio frequency matches the frequency of the FM Transmitter.
- Try a different frequency connection that does not interfere.
- Reconnect the device to the cigarette lighter socket and pair it again with Bluetooth.
- Most car radio systems always have some static in the connection.
- Try to find the right frequency with minimal static.
- We have conducted extensive tests, and the RECALL FM transmitter has at least static, and echo and provides the best HiFi music quality.

Why do I hear an echo?

- Check if the radio frequency matches the frequency of the FM Transmitter.
- During a call, check if the call channel is set correctly.
- Press the left or right button to change the channel.

Why is my device not charging?

- Did you connect the device after the car was started?
- Is the device properly connected to the cigarette lighter socket?
- Is the USB cable defective?
