### RME TotalMix FX Mixing-Routing with Superior Features for Studio and Live Work Datasheet

Since 2001 TotalMix added unlimited routing and mixing to RME's audio interfaces. Its unique capability to create as many independent submixes as output channels available turned it into the most flexible and powerful mixer of its kind.

With supported hardware, TotalMix FX includes a complete effects system, which not only adds flexibility to the recording chain, but also makes latency saddled software solutions obsolete. TotalMix FX (FX on supported cards) can completely replace an external mixer, enabling the creation of multiple latency-free monitor mixes with EQ, Dynamics, Reverb and Delay for any outputs incl. main monitors and headphone mixes for musicians.

**RME** USB, FireWire & Thunderbolt technology Interfaces

Fireface 802	
Fireface UFX1	
Fireface UFX II	
Fireface UFX+	
Fireface UCX / II	
Fireface UC	
Fireface 8001	
Fireface 4001	
Babyface1 (no Dynamics)	
Babyface Pro/FS (no Dynamics)	
MADIface Pro (no Dynamics)	
MADIface XT	
MADIface USB	
Digiface USB	
Digiface AVB	
Digiface Dante	

## RME PCI & Cardbus

HDSP 9632	
HDSP 9652	
HDSP PCI-Card1 2	
HDSP Cardbus1 2	
HDSP AES-32	
HDSP MADI1	

## RME PCI Express

HDSPe AIO/Pro	
HDSPe RayDAT	
HDSPe PCI-Card2	
HDSPe ExpressCard2	
HDSPe AES	
HDSPe MADI	
HDSPe MADIface1	
HDSPe MADI FX	
MADIface XT	

: with DSP Effects

: without DSP Effects

Discontinued – Out of Production, 2 Hostcard for Multiface II , Multiface, Digiface, RPM
