Robo Alive 7185 Battery-Powered Robotic Snake

Launch Date: 2023

Price: \$17.99

Introduction

An extremely lifelike and interactive toy that replicates the movements of a genuine snake is the Robo Alive 7185 Battery-Powered Robotic Snake. It provides both children and collectors with an exciting experience because to its realistic crawling motions, LED eyes, and sturdy construction. Three AAA batteries power the snake, which can move on its own or be controlled by users for hours of fun. By introducing kids to the world of robotics and letting them witness the amazing motions of a genuine snake, the Robo Alive 7185 blends entertainment value with educational value. It is the ideal addition to any toy collection because of its enormous size, realistic appearance, and entertaining functions.

Specifications

- **Model Number:** 7185
- **Type:** Battery-Powered Robotic Snake
- **Material:** High-quality plastic body
- **Dimensions:** Approximately 31 inches in length
- **Weight:** Around 1 lb (varies slightly by model)
- **Power Source:** 3 x AAA batteries (not included)
- **Battery Life:** Varies based on usage, approximately 30-45 minutes of continuous play
- **Movement:** Realistic slithering movement (forward and backward)
- **LED Lights:** Eyes light up during movement
- **Age Range:** Suitable for children ages 3 and up
- **Operating Temperature:** 5°C to 35°C (41°F to 95°F)
- **Sound Effects:** Hissing or mechanical sound during movement (varies by model)

Package Includes

- 1 x Robo Alive 7185 Battery-Powered Robotic Snake
- 1 x User Manual
- 1 x Instruction Sheet
- **Note:** *Batteries (3 x AAA) are not included*

Features

1. **Realistic Motions:** The slithering movements of the Robo Alive King Python are realistic and resemble those of a real snake. Its ability to move intelligently allows it to travel forward and backward with ease, giving its performance a more genuine feel. The play experience is immersive since the snake glides smoothly and behaves like a real snake would in the wild.
2. **LED Eyes:** The Robo Alive King Python adds a visual feature that makes it even more realistic and gives it a more lifelike appearance thanks to its glowing LED eyes. The snake's eyes glow as it moves, giving the impression that it is looking for its victim.
3. **Interactive Play:** By letting players tilt, push, or let it move on its own, this robotic snake provides entertaining, interactive play. It offers everyone a fun and interesting experience, regardless of whether you choose to manipulate the snake's movements or let it travel on its own.
4. **Sturdy Design:** Made from premium plastic, the Robo Alive King Python is built to resist the demands of vigorous play. Its robust body can withstand knocks, drops, and other shocks and still function flawlessly. After several uses, its durability guarantees that it will remain intact and useful.
5. **Powered by a battery:** The Robo Alive King Python is simple to operate and has a long playtime thanks to its three AAA batteries (separately available). The toy's battery compartment is easily accessible for a hassle-free and speedy replacement, guaranteeing prolonged operation.
6. **Fun and Educational:** The Robo Alive King Python is an excellent educational tool for children to learn about robotics and animal behavior. Children learn about genuine snakes and their natural movements as well as the notion of mechanics and robotic functions as the snake wanders around the room.
7. **Excellent for Play and Display:** The Robo Alive King Python is a fascinating display item in addition to being a toy. It is ideal for both interactive play and collection display because to its realistic design and lifelike slithering motion. The Robo Alive snake is a unique addition to any space, whether it is used as a game or as décor.
8. **GIANT SIZE:** The Robo Alive King Python is enormous, standing 31 inches (80 cm) from tongue to tail! It is the ideal option for anyone wishing to prank their friends or add a massive, lifelike snake to their collection because of its intimidating size, which enhances its realistic appeal.

← 31in/80cm →

9. **Smart Movement Technology:** The King Python's realistic slithering motion is enhanced by its smart movement technology. Because of this technology, the snake can move realistically, giving the impression that it is actively looking for prey.
10. **Play a Practical Joke on Your Friends:** The Robo Alive King Python is made for practical jokers! It is the ideal prank tool because of its realistic movements and massive size. To scare your buddies, you can conceal it beneath a table, smuggle it into a backpack, or put it anywhere. It's a fantastic method to prank or surprise people with little work.
11. **Realistic Appearance:** The King Python's skin texture and features are remarkably lifelike. To increase the fear and thrill, the snake's body is meticulously designed to resemble a real python. Its attention to detail makes it incredibly lifelike, and it moves by flicking its tongue.
12. **Batteries Not Included:** Three AAA batteries are needed to run the Robo Alive King Python. These batteries need to be bought separately because they are not part of the kit. For continuous play, be sure you have new batteries on hand.

Usage

How to Operate:

1. Install 3 x AAA batteries into the compartment (battery cover can be opened using a screwdriver).
2. Turn the switch to the "ON" position to activate the snake's movement.
3. The snake will start slithering forward and back. It moves autonomously, so just let it go!
4. You can control its movement by tilting or adjusting its position on the floor or surface.

Recommended Play Areas:

- Ideal for smooth, flat surfaces such as hardwood floors, tile, or carpet.
- It can also be used outdoors, but avoid uneven surfaces as it may impact its movement.

Care and Maintenance

- **Battery Care:** Always remove the batteries when the toy is not in use for extended periods to prevent leakage and corrosion.
- **Cleaning:** Use a soft cloth to wipe down the toy, avoiding excess moisture. Do not submerge it in water as it can damage the internal components.

- **Storage:** Store the Robo Alive snake in a dry place away from direct sunlight and extreme temperatures.
- **Battery Replacement:** Replace the batteries with new ones when the movement slows down or the LED lights begin to dim.
- **Check for Damage:** Regularly check the battery compartment for any corrosion, and ensure the toy is functioning correctly. If it is making unusual sounds or not moving, check for obstructions or damage.

Troubleshooting

1. **Problem:** The Robo Alive snake is not moving.
 - **Solution:** Check if the batteries are correctly installed and not depleted. Replace the batteries if necessary. Ensure that there are no obstructions in the snake’s movement.
2. **Problem:** The LED eyes are not lighting up.
 - **Solution:** Replace the batteries as the LED lights are powered by them. If the lights still do not work, inspect the connections or the LED components.
3. **Problem:** The snake is not moving smoothly or has irregular motion.
 - **Solution:** Ensure that the surface is flat and smooth. If the toy is used on a rough or uneven surface, it may not move properly. Clean the wheels or motor area to remove any dust or debris.
4. **Problem:** The snake makes a strange noise while moving.
 - **Solution:** This could be due to dirt or debris inside the motor or gears. Turn off the toy and check for any blockages. If the issue persists, contact customer service for repairs.
5. **Problem:** The Robo Alive snake stops working entirely.
 - **Solution:** Check if the batteries need replacing. If the toy still doesn’t work after a fresh battery replacement, inspect the wiring or motor for any damage.

Pros and Cons

Pros	Cons
Realistic movements enhance the play experience	Requires batteries that are not included
Durable construction ensures longevity	May not perform well on carpets
Engages children’s imagination	Small parts may pose choking hazards

Warranty

The Robo Alive 7185 comes with a limited warranty covering manufacturing defects. For warranty claims, retain your purchase receipt and contact ZURU’s customer service for assistance.

FAQs

What is the Robo Alive 7185 Battery-Powered Robotic Snake?

The Robo Alive 7185 is a lifelike robotic snake that mimics the movements of a real snake, featuring slithering motions, LED eyes, and interactive play functions.

How does the Robo Alive 7185 move?

The Robo Alive 7185 uses smart movement technology to mimic the slithering motion of a real snake, moving forward and backward autonomously or by tilting it.

What size is the Robo Alive 7185 Battery-Powered Robotic Snake?

The Robo Alive 7185 is a giant snake, measuring 31 inches (80 cm) from tongue to tail, giving it an imposing, lifelike appearance.

How are the Robo Alive 7185's LED eyes powered?

The LED eyes of the Robo Alive 7185 are powered by the same 3 x AAA batteries that power the snake, glowing as it moves to enhance its lifelike look.

What age group is the Robo Alive 7185 suitable for?

The Robo Alive 7185 is ideal for children aged 3 and up, offering an engaging toy experience while also being safe and durable for younger kids.

What batteries does the Robo Alive 7185 require?

The Robo Alive 7185 requires 3 x AAA batteries, which are not included and must be purchased separately.

What makes the Robo Alive 7185 snake so realistic?

The Robo Alive 7185 features a highly detailed design with a realistic snake skin texture, as well as a smart movement system that mimics the natural behavior of a snake.

How does the Robo Alive 7185 perform in terms of durability?

The Robo Alive 7185 is built with durable plastic, designed to withstand drops and bumps, ensuring that it continues functioning for a long time.

How long does the Robo Alive 7185 run on batteries?

The Robo Alive 7185 offers extended playtime on 3 x AAA batteries, though the duration depends on usage. Replacement batteries are easy to find.
