4. At the same time, you can choose to open or close the Read or Translation on the floating window interface. If you don't want to display the floating window, click the upper right corner to close it. (This function is only available for Android phones, not Apple phones)

11. Text automatic translation

1. Open the “Speak Freely Pro” application home page interface, set the Source language as your own language, and switch the Target language to the other party's language

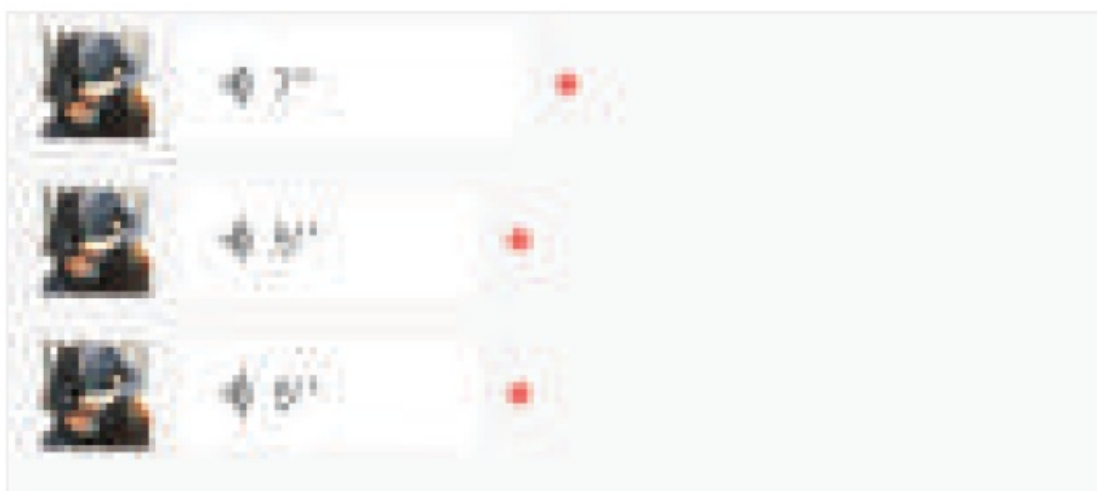

2. When a foreign friend or customer sends a message in English or other languages, press and hold to copy the content, and then switch to the “Speak Freely Pro application home page interface, the copied content will be automatically entered into the text box, and the content will be automatically translated into the Source language.

12. Voice automatic translation

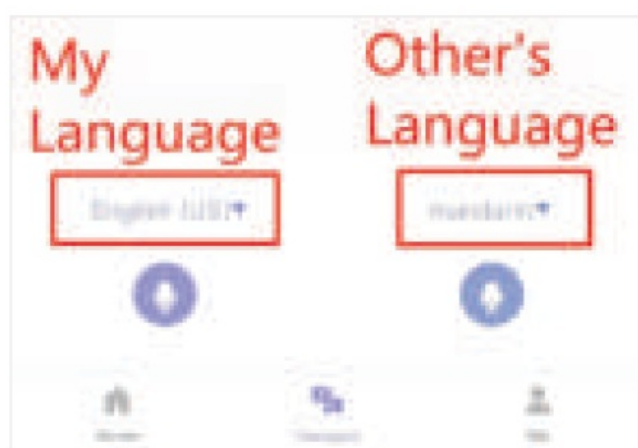

Open the “Speak Freely Pro” application home page interface, set the Source language as your own language, and switch the largest language to the other party's language,

Press and hold the Control Key of the Bluetooth device, then click to play the voice message, and then release the Control Key until the playback is complete, and the voice translation result will be broadcast immediately.

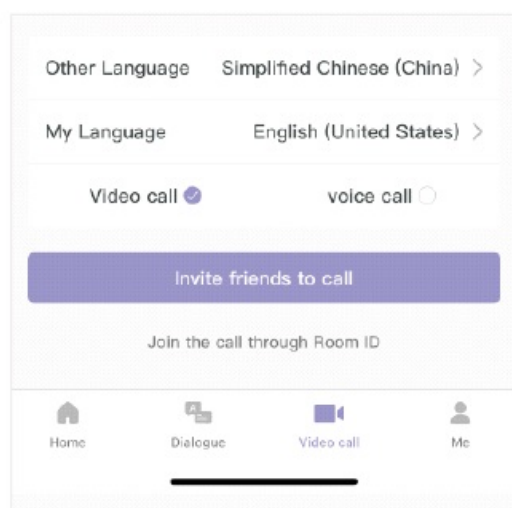

13. Dialogue translation

When talking face-to-face with foreign friends or customers, open the “Speak Freely Pro” app dialogue translation interface, set your own language and the other party’s language, then press and hold the microphone button on the screen, speak to the phone, release it after speaking, Immediately the translation will appear and be broadcast.

14. Audio and video call:

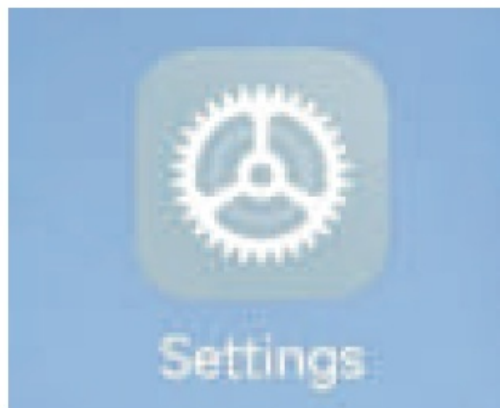

1. When communicating remotely with foreign friends or customers, open the “Free Talk Pro” application video call interface, set your own language, the other party’s language, and call type, and then click to invite friends to call. Send the invitation link to the friend, and ask them to open this link and join the call. Return to the app and wait for friends to answer.
2. After connecting, each person speaks their native language, and the app will translate the sounds they hear in real-time, with bilingual subtitles appearing.

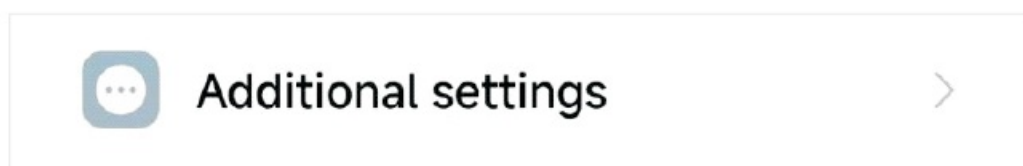

Note: If the invitation link is not used for more than five minutes, it will become invalid. Please re invite and send the latest link to your friend.

FAQ

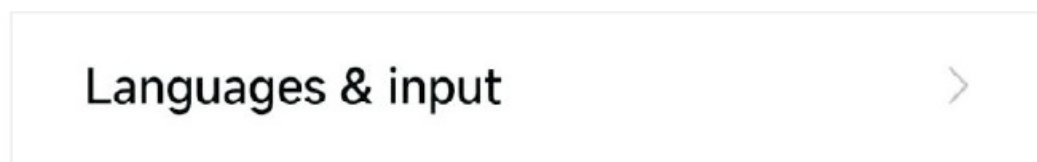

1. This Bluetooth device is compatible with the mobile phone models of major manufacturers, and realizes the connection through Bluetooth connection control. If the built-in input method of the mobile phone conflicts with the function of this product, it is recommended to download and install “Baidu input method” to use it together, and the use will be more smooth.
2. If there is a conflict between the built-in input method and the function of this product on Android phones of different manufacturers, turn on “Use the on -screen keyboard” to recover (the steps are as follows), Take Xiaomi mobile phone as an example: First open the settings:

1. Find and click

2. Click into

3. Replace the input method with: Baidu Input Method

3. Some Android phones can't see the input method keyboard in the input box after installing the APP, because some phones turn off the on-screen keyboard by default, and Enable “Use the on-screen keyboard” to estore it (the steps are as follows)

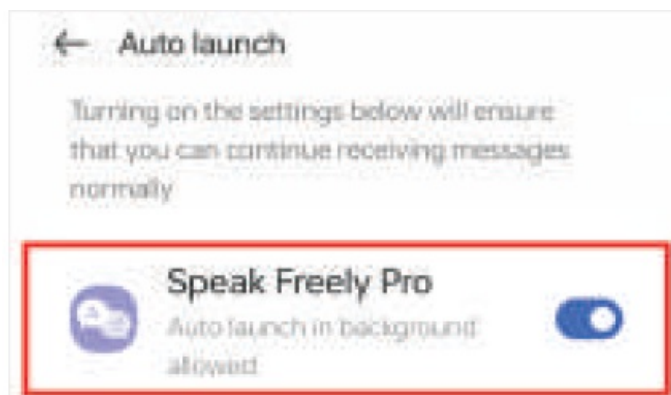

1. Take Xiaomi mobile phone as an example: Open Settings→ Additional setting→ Languages & Keyboard mouse. Enable” Use On-Screen ‘(as shown in the figure below)

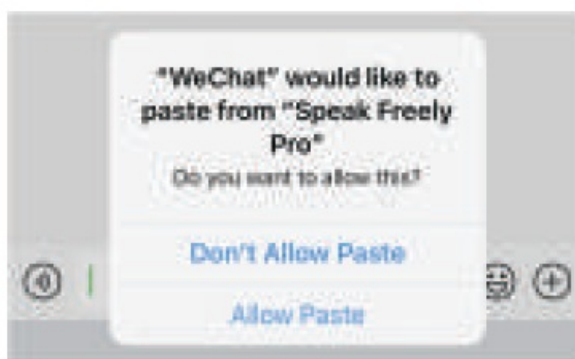

2. Other Android brand mobile phones follow similar steps, and you can also find and enable “Use the on-screen keyboard” in the Languages & Input to restore it.
4. The response speed is slow, please check whether the 4G/WiFi network is good.
5. When the “Speak Freely Pro” app is running in the background on some Android phones, there is no response when pressing and holding the voice control button, because some phones default to turning off the background self-starting, and you need to turn on the “Speak Freely Pro” Auto launch in background to restore it (the steps are as follows)

Steps: Settings→Applications&Permissions→Privilege Management→Auto launch→Allow “Speak Freely Pro to Auto launch in background

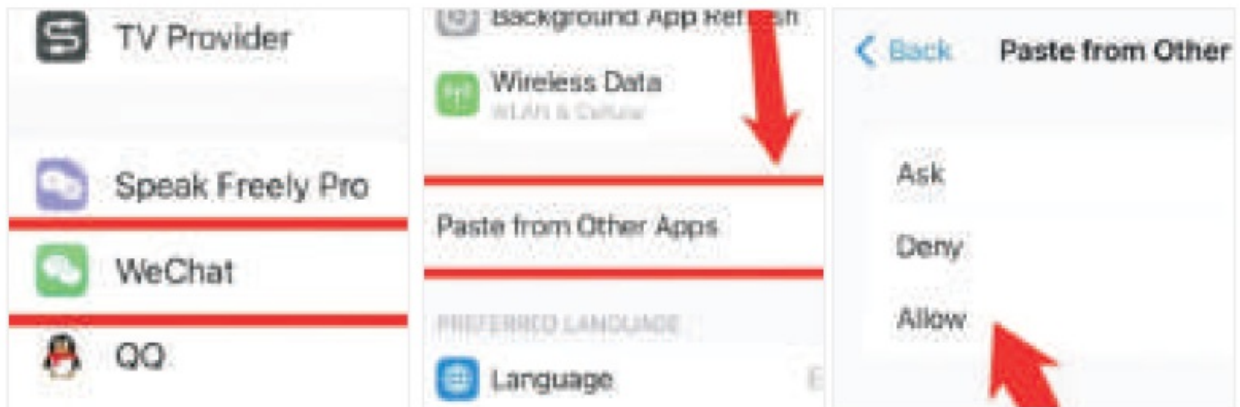

6. Repeated sentences appear when voice input is converted to text. Solution: Install and use the recommended “Baidu Input Method” together, and the use will be smoother.
7. Tutorial for turning off the paste prompt on Apple mobile phones:

1. Step 1: Open Settings
2. Step 2: In the settings, swipe to the bottom to find the APP you need. Here we take WeChat as an

example to see how to close the pop-up prompt. As shown in the figure below.

3. Step 3: Enter the APP interface, you can see [Paste from Other Apps] in the bottom column, and the system defaults to [Ask]. Click to enter, as shown in the figure below.
4. Step 4: Change the status of [Ask] to [Allow], and the prompt pop-up window will not appear again.

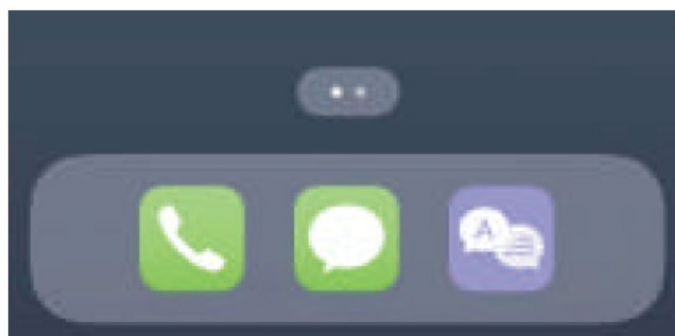

If you have the same situation with other applications, please follow the same method as above to find the corresponding application.

Installation method

Tips

In order to open and use the “Speak Freely Pro” application more conveniently and quickly, after the application is installed, long press the Speak Freely Pro” icon, and then pull down to the shortcut navigation bar at the bottom of the phone.
