| Release Date | App Version | Doc Version | Details |
|---|---|---|---|
| June 06, 2016 | 2.0.0 | v.1.0.0 | First Release |
| June 29. 2018 | 2.0.0 | v.1.0.1 | Revised the company name |
| December 25, 2021 | 2.0.0 | v.1.0.2 | Revised the company name<br>Deleted the document status: confidential |

**Chapter 1 Overview**

router support multi-language. Each language will be developed to an App and need to install in router.

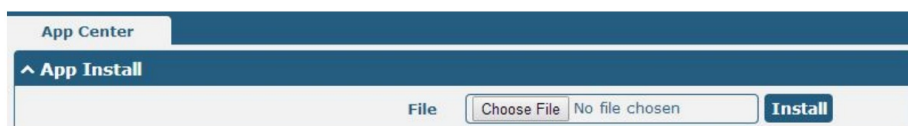

**Language display**

**Chapter 2 App Installation**
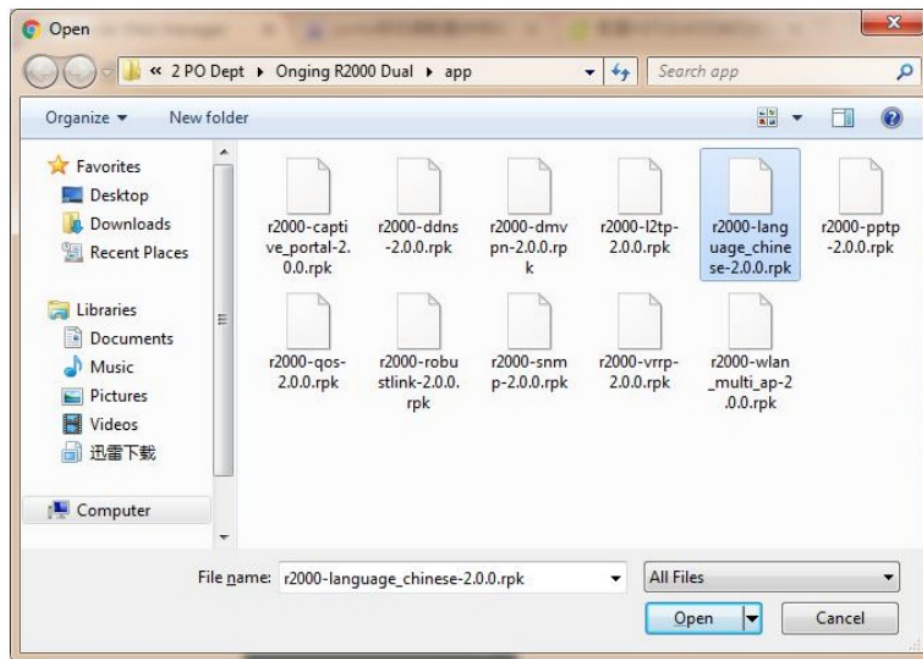

**2.1 Installation**

Here use Chinese language as an example to show the installation steps.
Path: **System->App.**

1 Please place Language App .rpk file (e.g. r2000-language-2.0.0.rpk) into a free disk of PC. And then log in router configuration page; go to **System->App** as the following screenshot show.
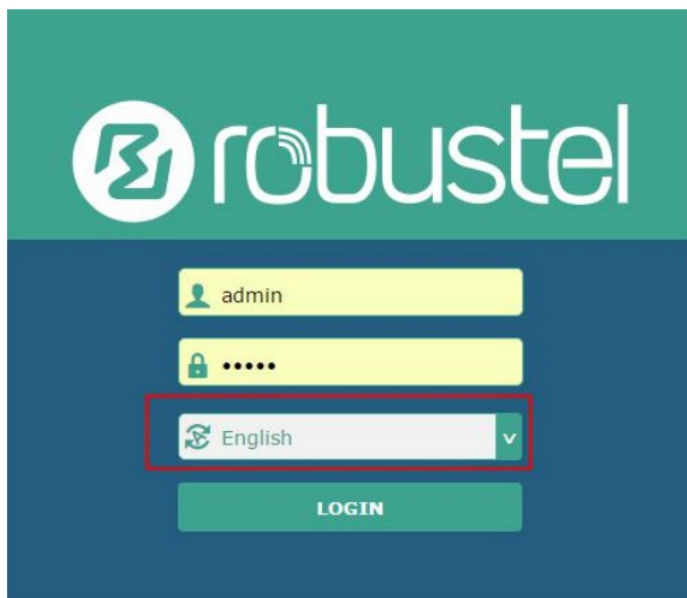

2 Click "Choose File" button, select Language App .rpk file from the PC, then click "Install" button of router configuration page.

3 When the rate of installation progress reach 100%, the system will pop up a reboot router reminder window. Please click "OK" to make router reboot.

4 After router power on again, go to login page, it will show the new language selection box, so that we can choose the Chinese language and log in Chinese language system.

Go to **System->App Center**, Chinese Language App will be included in App Center's "Installed Apps" list.

**2.2 Uninstallation**

Path: **System->App Center**

1 Go to "**Installed Apps**", find Language App and then click " ✕ ".

2 Click "OK" in the router reboot reminder popup window. When router finish restart, Language had been uninstalled.
