ROCKETBOOK

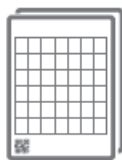

## ROCKETBOOK Fusion Smart Reusable Notebook

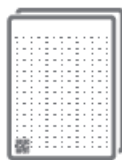

Learn more at [start.getrocketbook.com](http://start.getrocketbook.com)

## Write

The Rocketbook Fusion has three sets of page types for all your plans and notes. These pages are waterproof, tear-resistant, and reusable

**Planner/Calendar**

**Dot Grid**

**Lined**

### **Planner/Calendar**

For getting things done and planning ahead

### **Dot Grid**

For sketches, graphs, and creative work.

### **Lined**

For notes, letters, and journal entries.

### **Writing With the Pilot FriXion Pen (Included)**

Only use Pilot FriXion pens and markers with the Fusion. To prevent smudging, allow 15 seconds for ink to bond to the page. If the pen skips, try moistening the tip.

### **Pilot FriXion Pen Information**

FriXion ink disappears at 140°F (60°C), so be careful about leaving your notebook and pen in a hot car, as the ink may fade.

## Scan

### **Download the App**

Use the free Rocketbook app to scan and send your page into the cloud! Available for iOS and Android.

### **Setting Up Destinations**

Go to Destinations and follow the on-screen instructions to connect the shortcut symbols to email and cloud services.

### **Scan and Send**

Mark a symbol at the bottom of the Rocketbook page. On the Scan screen in the app, take a scan, and follow the on-screen instructions to Send to email or cloud services.

To get the best scan, make sure you scan in a well-lit environment and watch out for shadows.

## Tips

### **Handwriting Recognition (OCR)**

Do some magic with your handwritten text! Go to Settings > Handwriting Recognition (OCR) to enable the following features.

- **Smart Titles** – Auto-name scans with text between double hashtags (ex: ## Filename ##)

- **Smart Search** – Search your handwritten text
- **Email Transcription** – Send a full text transcription via email

## Bundling

Want to group your pages into one file?

- In the app, go to one of your Destinations and make sure Bundle Scans is on
- On Rocketbook pages you'd like to group together mark the symbol with Bundle Scans on
- Scan the pages in the order you'd like them to be grouped

## Reuse

### Erasing

Dampen part of the included microfiber towel with water and wipe the page. Then wipe it down with the dry portion of the towel. Make sure the page is dry before writing on it again. For easier erasing, use a fine mist spray bottle.

### Keep Your Fusion Clean

It's best to keep your Fusion pages wiped clean when you don't plan to use it for a month or longer. This ensures that the pen ink doesn't leave a residue.

### Do Not Microwave Your Fusion

Rocketbook also makes the Wave, a microwave-to-erase notebook. Please don't confuse the Fusion with the Rocketbook Wave!
