JUNO-X

Roland Cloud SH-101 Model Expansion User's Guide

Using the SH-101 Model Expansion

This manual explains how to use SH-101 Model Expansion with the JUNO-X. There are two ways to use SH-101 Model Expansion. In this manual, we explain how to do this via Roland Cloud Manager.

Using Roland Cloud Manager

On your computer, use the Roland Cloud Manager to download the SH-101 Model Expansion files from Roland Cloud. Use a USB flash drive to import the files into the JUNO-X.

- Click here for more information on Roland Cloud.
- Click here to download the Roland Cloud Manager and Owner's Manual.
 - * You must purchase a Lifetime Key for the data if you want to use Roland Cloud Manager.
 - * Data that was downloaded with only a Roland Cloud membership can't be loaded into the JUNO-X.

Using Roland Cloud Connect

Use Roland Cloud Connect (sold separately) and your smartphone to import the SH-101 Model Expansion files into the JUNO-X.

- Click here for more information on Roland Cloud Connect.
 - * If you are using Roland Cloud Connect (sold separately), you can use the SH-101 Model Expansion files even on a membership basis.

Updating the JUNO-X to the Latest Version

Before using the SH-101 Model Expansion, you must update the JUNO-X to the latest version.

Download the latest software from the website below, and follow the steps listed to update.

https://roland.cm/juno-x_dl

Downloading the SH-101 Model Expansion by Using Roland Cloud Manager

This explains how to use Roland Cloud Manager to download and install the SH-101 Model Expansion files.

Installing the Roland Cloud Manager

1. On your computer, download Roland Cloud Manager from the Roland Cloud website.
Access the website listed below to download the appropriate installer for your computer.
<https://roland.cm/RolandCloudManager>
2. Double-click the installer you downloaded to begin the installation.
Proceed with the installation by following the directions shown onscreen.
When you see a message saying that the installation was successful, click the [Close] or [Finish].
3. Start the Roland Cloud Manager that you installed, and register your account.
Follow the onscreen instructions to register.

Downloading the SH-101 Model Expansion

1. Start Roland Cloud Manager.
2. Click “Hardware” on the Menu tab.
A list of hardware appears.
3. Click “JUNO-X”.
A list of contents appears.
4. Click SH-101 Model Expansion.
The SH-101 Model Expansion download page appears.
5. Click “Get Lifetime Key” to purchase a Lifetime Key.
6. Once you’ve made your purchase, click “Library” on the Menu tab.
A list of the contents you have purchased appears.
7. Select “SH-101 Model Expansion” and download.

Using the SH-101 Model Expansion Installing the SH-101 Model Expansion

Saving Files To a USB Flash Drive

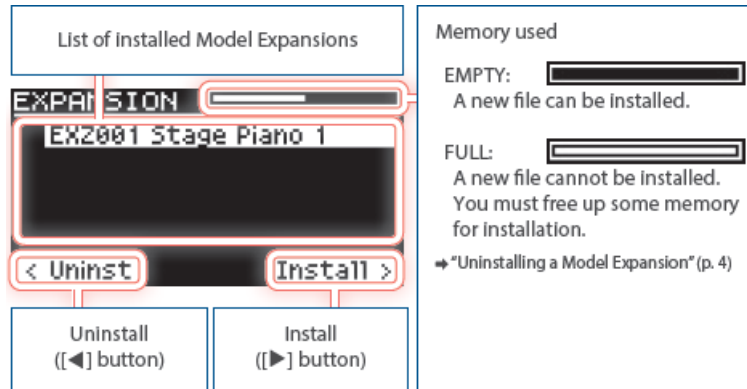

- * When using a USB flash drive for the first time, you must format it on the JUNO-X.
“Formatting a USB Flash Drive” (Startup Guide)
1. Connect the USB flash drive to your computer.
 2. Save the file (EXM004_SH101.exz) to the root directory of the USB flash drive.
 3. Disconnect the USB flash drive from your computer.

Installing on the JUNO-X

1. Insert the USB flash drive you prepared in “Saving Files To a USB Flash Drive” into the JUNO-X.

2. Turn the power of the JUNO-X on while holding down the [ENTER] (INIT) button.

The EXPANSION top screen appears.

3. Press the [▶] button to go to the installation screen.

4. Use the [▲ SELECT ▼] knob to select "EXM004_SH101", and press the [ENTER] (INIT) button or the [▶] button.

A confirmation message appears.

If you decide to cancel, press the [EXIT] button.

MEMO

The user license registration screen appears if you're installing for the first time.

To continue installing, use the [▶] button to select "OK", and then press the [ENTER] (INIT) button.

5. To execute, use the [- VALUE +] knob to select "OK", and then press the [ENTER] (INIT) button.

6. Turn the power off, then on again.

This allows you to use the SH-101 Model Expansion.

Error Messages

Indication – Action

Expansion Memory Full! – There is not enough memory available for installation.

Follow the steps in "Uninstalling a Model Expansion" to free up the memory.

Incorrect License! Please Remove License – The SH-101 Model Expansion is currently linked to a different user license.

Follow the steps in "Initializing Your User License" (p. 5) to initialize the user license.

Uninstalling a Model Expansion

If there is not enough free memory, you can uninstall Model Expansions that are already installed, and then install the SH-101

Model Expansion.

1. Hold down the [ENTER] (INIT) button and turn the JUNO-X on. The EXPANSION top screen appears.

2. Use the [▲ SELECT ▼] knob to select the file to uninstall, and then press the [◀] button to go to the uninstallation screen.

A confirmation message appears.

If you decide to cancel, press the [EXIT] button.

3. To execute, use the [- VALUE +] knob to select “OK”, and then press the [ENTER] (INIT) button.

MEMO

The uninstall process works the same even if you’ve installed the Model Expansion with Roland Cloud Connect (WC-1).

User License

The Model Expansions are linked to the user license of the user who downloaded them.

You cannot import or install Model Expansions with different user licenses on a single JUNO-X.

When you want to import or install a SH-101 Model Expansion that has a different user license from the Model Expansions already registered in the JUNO-X, follow the steps to initialize the user license.

Initializing Your User License

By initializing the user license, you can install a SH-101 Model Expansion that you’ve downloaded with a new user license.

NOTE

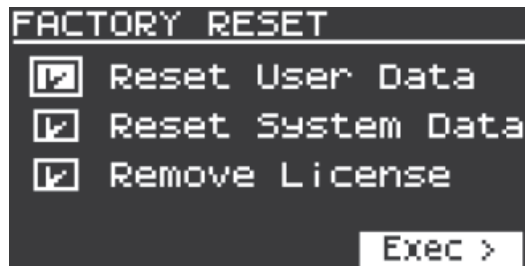

- This deletes all Model Expansions that are already installed.
- Never turn off the power or remove the USB flash drive while the “Executing...” message is shown.

1. Press the [MENU] (WRITE) button on the JUNO-X.
2. Use the [▲ SELECT ▼] knob to select “UTILITY”, and

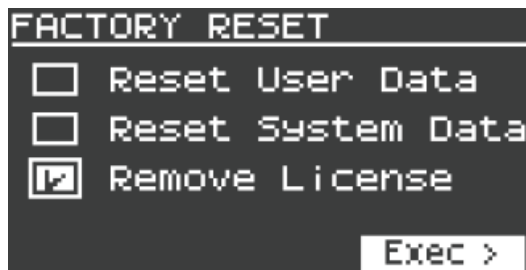

press the [ENTER] (INIT) button.

3. Use the [▲ SELECT ▼] knob to select “FACTORY RESET”, and then press the [ENTER] (INIT) button.

The FACTORY RESET screen appears.

4. Select the item using the [▲ SELECT ▼] knob, and using the [ENTER] (INIT) button to select or deselect the items, select only the “Remove License” check box.

* If you have not imported or installed a Sound Pack, Wave Expansion or Model Expansion, the “Remove License” check box is not shown.

* If you select the other check boxes besides the “Remove License” check box and execute this operation, this initializes all of the corresponding data. See “Returning to the Factory Settings (Factory Reset)” in the JUNO-X Startup Guide for details.

5. Press the [▶] button.

A confirmation message appears.

If you decide to cancel, press the [EXIT] button.

6. To execute, use the [- VALUE +] knob to select “OK”, and then press the [ENTER] (INIT) button.

“Completed. Turn off power” is shown on the display.

7. Turn the JUNO-X off.

This initializes the user license.

8. Follow the steps in “Installing the SH-101 Model Expansion” (p. 4) to install the SH-101 Model Expansion on the JUNO-X.

Error Messages

Indication – Action

USB Memory Not Ready!

The USB flash drive cannot be recognized. Make sure that your USB flash drive is correctly inserted into the JUNO-X.

Expansion File Not Found!

This is shown when there is no Expansion file in the USB flash drive.

Make sure that the file has been correctly saved and that the file extension is “.exz”.

Incorrect File!

This is shown when the selected file is not supported by the JUNO-X, or when the file is corrupted.

Check which instruments support the original download, and try downloading again.

Incorrect License! Please Remove License

This is shown when the SH-101 Model Expansion is currently linked to a different user license.

To install, provide a file that uses the same user license as the Expansion already installed, or initialize the user license.

Expansion Memory Full!

This is shown when there is not enough free memory to install an Expansion.

In this case, you can uninstall Model Expansions that are already installed to free up memory.

It has already been installed

This is shown when the SH-101 Model Expansion has already been installed.

You don't need to reinstall.

Using the SH-101 Model Expansion

Selecting a Tone

1. Press the [MODEL BANK] button.
The MODEL BANK top screen appears.

2. Use the [▲ SELECT ▼] knob to move the cursor to the model name/category name.
3. Use the [- VALUE +] knob to select “SH-101”.
4. Use the [▲ SELECT ▼] knob to move the cursor to the

tone number.

5. Use the [- VALUE +] knob to select the tone.

MEMO

Move the cursor to the model name/category name or the tone number and press the [ENTER] (INIT) button. The tone list appears.

6. Press the [ENTER] (INIT) button to select the tone.

Registering the SH-101 to a model bank

1. Hold down the [MODEL BANK] button and press a model bank button ([1]–[16]).
2. Use the [▲ SELECT ▼] knob to move the cursor to “Attr”.
3. Use the [- VALUE +] knob to select “MODEL”.
4. Use the [▲ SELECT ▼] knob to select where to register the SH-101.
5. Use the [- VALUE +] knob to select “SH-101”.
6. If you want to save the setting, execute the System Write operation.
 - 6-1. Hold down the [SHIFT] button and press the [MENU] (WRITE) button. The WRITE MENU screen appears.
 - 6-2. Use the [◀ SELECT ▶] knob to select “SYSTEM”, and then press the [ENTER] (INIT) button.
 - 6-3. To execute, press the [ENTER] (INIT) button.

Selecting a SH-101 tone using the model bank

1. Press the [MODEL BANK] button.

The MODEL BANK top screen appears.

Use the [1]–[16] buttons to switch to tone select mode.
2. Select the model bank where you registered the SH-101 by pressing one of the [1]–[16] buttons.

The tones for the SH-101 are shown.

You can use the [- VALUE +] knob to select a tone on this screen as well.
3. Press the [ENTER] (INIT) button.

A list of tones is shown.
4. Use the [- VALUE +] knob to select the tone.

You can use the [▲ SELECT ▼] knob to select the tone quickly.
5. Press the [ENTER] button.

The tone is now selected.

Parameter Guide

TONE Parameters

TONE COMMON
SH-101

Parameter	Value	Explanation
(name)	Tone name	
Catg	CATEGORY	Selects the tone's category.

TONE
SH-101

Parameter	Value	Explanation	CC#
LFO RATE	0–1023	Specifies the speed of the LFO cycle.	29
LFO WAVEFORM	TRI, SQR, S&H	Specifies the LFO waveform.	
OSC LFO MOD	0–100	Adjusts the depth at which the LFO modulates the OSC.	26

OSC RANGE	16', 8', 4', 2'	Specifies the oscillator's octave.	47
PULSE WIDTH MOD	0–127	PW MODE = MANUAL Adjusts the pulse width value.	50
		PW MODE = LFO/ENV: Adjusts the depth of modulation.	
PW MODE	Specifies the pulse width mode.		
	LFO	The pulse width is affected by the LFO.	
	MANUAL	The pulse width is affected by PULSE WIDTH MOD.	
	ENV	The pulse width is affected by ENV.	
PW LEVEL	0–255	Adjusts the volume of the pulse wave.	16
SAW LEVEL	0–255	Adjusts the volume of the sawtooth wave.	17
SUB OSC LEVEL	0–255	Adjusts the volume of the sub oscillator.	18

SUB OSC	Specifies the SUB OSC type.		
	1OCT DN	One octave lower	
	2OCT DN1	Two octaves lower	
	2OCT DN2	Two octaves lower (small pulse width)	
NOISE LEVEL	0–255	Adjusts the noise volume.	19
VINTAGE FLT TYPE	R, M, S	Selects one of three response curves, each modeling the LPF of an analog synthesizer of the past.	108
CUTOFF	0–1023	Specifies the cutoff frequency of the low-pass filter. The frequency region above the cutoff frequency is cut, producing a more mellow tonal character.	3
RESONANCE	0–1023	Boosts the region of the filter's cutoff frequency. Higher values produce a stronger result, giving the sound a distinctively synthesizer-like character.	9
FLT ENV DEPTH	-1023–+1023	Adjusts the amount by which the cutoff frequency is controlled by the envelope.	81

FILTER MOD	0–100	Adjusts the amount by which the LFO modulates the cutoff frequency.	28
FLT KEY FOLLOW	0–200	Varies the filter's cutoff frequency according to the note played on the keyboard.	82
AMP ENV SEL	ENV F&A, G-AMP	Specifies whether the volume is controlled by the ENV (ENV F&A) or stays at a fixed volume as long as the key is held down (G-AMP).	
AMP LEVEL	0–127	Adjusts the volume of the tone.	110
ENV MODE	Specifies what causes the envelope to attack.		
	GATE+TRIG	Attack each time a key is pressed.	
	GATE	Attack when a key is pressed anew. No attack when playing legato.	
	LFO	Attack repeatedly at each cycle of the LFO as long as the key is held.	
ENV ATTACK	0–1023	Specifies the ENV Attack time.	89

ENV DECAY	0–1023	Specifies the ENV Decay time.	90
ENV SUSTAIN	0–1023	Specifies the ENV Sustain level.	102
Parameter	Value	Explanation	CC#
ENV RELEASE	0–1023	Specifies the ENV Release time.	103
BEND PITCH	0–1500	Specifies the range of pitch change produced by pitch bend.	
BEND FILTER	0–63	Specifies the range of filter change produced by pitch bend.	14
MODULATION LFO	0–63	Specifies the amount of LFO applied by modulation.	
PORTA MODE	Turns portamento on/off. If this is on, the pitch will change smoothly from one note to the next-played note.		
	OFF	Regardless of the portamento time setting, portamento is not applied.	
	ON	Portamento is always applied.	

	AUTO	Portamento is applied only when you play legato (pressing the next key before completely releasing the previously-played key). This lets you use your playing technique to control portamento on/off.	
PORTA TIME	0–1023	Adjusts the time over which the portamento pitch change occurs.	5
PORTA CRV	Specifies the pitch change curve for portamento.		
	ORIGINAL	Change according to the original curve of the model.	
	LINEAR	Change in a linear curve.	
	EXP1	Change in a non-linear curve (gentle slope).	
	EXP2	Change in a non-linear curve (steep slope).	
KEY MODE	Specifies how notes are sounded.		119
	POLY	Polyphonic	
	SOLO	Monophonic	

	UNISON	Unison	
	SL-UNISON	Monophonic unison	
AFT LFO	-63—+63	Sets how much aftertouch changes the LFO intensity . ** This is only enabled for products with aftertouch.	
AFT FREQ	-63—+63	Sets how much aftertouch changes the lowpass filter intensity. ** This is only enabled for products with aftertouch.	
AFT LEVEL	-63—+63	Sets how much aftertouch changes the tone volume. ** This is only enabled for products with aftertouch.	
PITCH DRIFT	0—255	Adjusts the slight pitch drift that occurs when notes are played on an analog synthesizer.	
PARAM EXPANSION	OFF, ON	If this is “ON,” the range of change for LFO RATE, CUTOFF, RESONANCE, and FILTER ENV DEPTH is wider than on the original model.	
CONDITION	0—100	Simulates the changes that occur as a unit ages.
