## What devices are compatible with Romansei itemlocators?

Romansei item locators only work with iOS devices.

## Where can you use the Romansei item locators?

Romansei item locators are perfect for almost anything, such as for keys, car keys, luggage, toys, backpacks, vehicles, clothing, purse, wallets, and etc. It is very common and popular to apply the Romansei item locators to car keys.

## How is privacy protected?

All communication with the 'Find My' network is anonymous and encrypted, and location data and history are not stored on the tracking tag, so as to protect your privacy.

## What can I do if I go beyond Bluetooth range to find my items?

If your items go beyond Bluetooth range, the 'Notify When Found' feature will be activated. When your Item location is seen by another Find My enabled device, you will receive a notification of its updated location.

## Does this tracker require a monthly fee?

No, there is no monthly fee.

## What is the battery life of this tracker?

This device uses a replaceable battery that lasts a year, eliminating the need for frequent battery changes.

## Does this tracker have an anti-tracking feature?

Yes, the item locator is equipped with an innovative anti-tracking feature designed to ensure your privacy and safety. Here's how it works:

Example Scenario:

Suppose you have an Item Locator attached to your personal belongings. If someone else's item locator, which is not paired with your iPhone, begins moving with you, your iPhone will promptly detect this anomaly. This detection triggers a notification to alert you of the presence of an unknown Item Locator.

This anti-tracking alert is specifically activated under the following conditions:

1. **Unknown Device Detection:** The alert is only triggered by Item Locators that are not connected to your phone.
2. **Selective Alert System:** If you are accompanied by a known Item Locator, like your partner's, which is paired with their phone, the system smartly recognizes this and does not trigger an alert. This ensures that you only receive notifications when truly necessary, preventing unnecessary disturbances and maintaining peace of mind.

Our commitment is to provide not only a convenient way to track your items but also to ensure your privacy and safety with smart, user-focused features.
