Speaker interface

Attention!

Be sure to listen to the sound from several places to determine the maximum sound. This is to prevent noise pollution.

The soundbar can be connected in several ways. We recommend considering the different options to see which method best meets your needs.

FUNCTIONAL OPERATION

Using the soundbar

Bluetooth connection method: Turn on the power switch and press the "M" key to switch to Bluetooth mode. Memory mode is the default mode by default.

Turn on the Bluetooth device, such as a computer or phone, and search for the Bluetooth device S9+.

Manually click “search equipment” to pair the Bluetooth name after the connection is successful, you will hear “Pairing Bluetooth connection success” and a “Dong” When another Bluetooth device is paired. If a code was used to pair the product, the code would be “0000”

Devices that have successfully paired with the machine will automatically connect to the original successfully paired device the next time the soundbar boots up.

NFC connection method: The function and method to pair the device, bring your phone close to the NFC logo, automatically search for “pairing connection”, when the connection is successful, the system will sound “NFC paired connection successful”. Need to open the NFC function, press ok and enjoy the fun of NFC.
