WHAT DO I DO WHEN...?

We are home – set operating mode to HOME We are traveling – set operating mode to AWAY We are using a lot of water – set operating mode to PAUSE

WHAT SHOULD I DO ABOUT ...?

WARNING – clear the warning and then check the cause.

ALARM – First check the cause. Ensure there is no visible leakage. Take action if needed. Turn the water back on by clearing the alarm.

Find the leak detection guide on www.Roth.Support/QuickStop_Pro_UK

In case of repeated alarms the cause must be carefully investigated.

1. The TEST indicator light flashes if the system is running a tightness test and keeps the light on while the device is monitoring flow.
2. The current operating mode lights up
continuously = HOME
flashes quickly = AWAY
flashes slowly = PAUSE
3. Press MODE for toggling between HOME/AWAY mode.
Keep the button pressed to go to PAUSE mode, in order to consume water for a longer time period without getting an alarm.
4. While the VALVE indicator is on, the valve is closed, and water cannot flow through it.
5. The **NETWORK** indicator turns off when the device is offline; flashes when the device is in pairing mode; and stays on when the device is online and connected to the Roth Cloud service.
6. Flashes on **WARNING** before the water is shut off. The lights are up continuously on ALARM and the water is shut off.
7. Press **CLEAR** briefly to silence the alarm sound. Keep it pressed to clear the alarm.
